

Information Supplement

Global Technology Leaders Portfolio 2018-2

American Innovation Leaders Portfolio 2018-1

This Information Supplement provides additional information concerning the risks and operations of the Portfolios which is not described in the prospectus. You should read this Information Supplement in conjunction with the prospectus. This Information Supplement is not a prospectus but is incorporated into the prospectus by reference. It does not include all of the information that you should consider before investing in a Portfolio. This Information Supplement may not be used to offer or sell Units without the prospectus. You can obtain copies of the prospectus by contacting the Sponsor's unit investment trust division at 3500 Lacey Road, Suite 700, Downers Grove, Illinois 60515-5456, or by contacting your broker. This Information Supplement is dated as of the date of the prospectus. All capitalized terms have been defined in the prospectus.

RISK FACTORS

Price Volatility. Because the Portfolios invest in securities of U.S. and foreign companies, you should understand the risks of investing in securities before purchasing Units. These risks include the risk that the financial condition of the company or the general condition of the securities markets may worsen and the value of the securities (and therefore Units) will fall. Securities are especially susceptible to general market movements. The value of securities often rises or falls rapidly and unpredictably as market confidence and perceptions of companies change. These perceptions are based on factors including expectations regarding government economic policies, inflation, interest rates, economic expansion or contraction, political climates and economic or banking crises. The value of Units will fluctuate with the value of the securities in a Portfolio and may be more or less than the price you originally paid for your Units. As with any investment, we cannot guarantee that the performance of a Portfolio will be positive over any period of time. Because the Portfolios are unmanaged, the Trustee will not sell securities in response to market fluctuations as is common in managed investments.

Dividends. Stocks represent ownership interests in a company and are not obligations of the company. Common stockholders have a right to receive payments from the company that is subordinate to the rights of creditors, bondholders or preferred stockholders of the company. This means that common stockholders have a right to receive dividends only if a company's board of directors declares a dividend and the company has provided for payment of all of its creditors, bondholders and preferred stockholders. If a company issues additional debt securities or preferred stock, the owners of these securities will have a claim against the company's assets before common stockholders if the company declares bankruptcy or liquidates its assets even though the common stock was issued first. As a result, the company may be less willing or able to declare or pay dividends on its common stock.

Technology Issuers. The Global Technology Leaders Portfolio invests primarily, and the American Innovation Leaders Portfolio invests significantly, in

companies in the technology sector, which includes information technology companies. The Portfolios may be particularly susceptible to a negative impact resulting from adverse market conditions or other factors affecting technology issuers because any negative impact on the technology industry will not be diversified among issuers within other unrelated industries. Accordingly, an investment in Units should be made with an understanding of the characteristics of the technology industry and the risks which such an investment may entail.

The market for technology products and services, especially those related to the Internet, is characterized by rapidly changing technology, rapid products obsolescence, cyclical market patterns, evolving industry standards and frequent new products introductions. The success of technology companies depends in substantial part on the timely and success introduction of new products. An unexpected change in one or more of the technologies affecting an issuer's products or in the market for products based on a particular technology could have a material adverse affect on an issuer's operating results. Furthermore, there can be no assurance that companies will be able to respond timely to compete in the rapidly developing marketplace.

The market for certain technology products and services may have only recently begun to develop, is rapidly evolving and is characterized by an increasing number of market entrants. Additionally, certain technology companies may have only recently commenced operations or offered equity securities to the public. Such companies are in the early stage of development and have a limited operating history on which to analyze future operating results. It is important to note that following its initial public offering, a security is likely to experience substantial stock price volatility and speculative trading. According, there can be no assurance that, upon redemption of your Units or termination of the Portfolio, you will receive an amount greater than or equal to your initial investment.

Based on trading history, factors such as announcements of new products or development of new technologies and general conditions of the industry have caused and are likely to cause the market price of

technology common stocks to fluctuate substantially. In addition, technology company stocks have experienced extreme price and volume fluctuations that often have been unrelated to the operating performance of such companies. This market volatility may adversely affect the market price of the Securities and therefore your ability to redeem your Units, or roll over your Units into a new trust, at a price equal to or greater than the original price paid for such Units.

Some key components of certain products of technology issuers are currently available only from single source. There can be no assurance that in the future suppliers will be able to meet the demand for components in a timely and cost effective manner. Accordingly, an issuer's operating results and customer relationships could be adversely affected by either an increase in price for, or any interruption or reduction in supply of, any key components. Additionally, many technology issuers are characterized by a highly concentrated customer base consisting of a limited number of large customers who may require product vendors to comply with rigorous and constantly developing industry standards. Any failure to comply with such standards may result in a significant loss or reduction of sales. Because many products and technology are incorporated into other related products, certain companies are often highly dependent on the performance of other computer, electronics and communications companies. There can be no assurance that these customers will place additional orders, or that an issuer of Securities will obtain orders of similar magnitude as past orders from other customers. Similarly, the success of certain companies is tied to a relatively small concentration of products or technology with intense competition between companies. Accordingly, a decline in demand for such products or technology from such customers could have a material adverse impact on issuers of the Securities.

The life cycle of a new technology product or service tends to be short, resulting in volatile sales, earnings and stock prices for many technology companies. Additionally, with the rapid evolution of technologies, competitive advantages tend to be short lived and product pricing usually falls. Historically, many of the

benefits from new technologies have gone to the consumer, as their creators have been unable to retain differentiation or pricing power. Some of the large technology companies have been involved in antitrust litigation and may continue to be in the future. A slowdown in corporate or consumer spending on technology will likely hurt technology company revenues. Technology companies rely on international sales for a meaningful part of their revenues. Any slowdown in international economies could hurt revenues.

Liquidity. Whether or not the stocks in a Portfolio are listed on a stock exchange, the stocks may delist from the exchange or principally trade in an over-the-counter market. As a result, the existence of a liquid trading market could depend on whether dealers will make a market in the stocks. We cannot guarantee that dealers will maintain a market or that any market will be liquid. The value of the stocks could fall if trading markets are limited or absent.

Additional Units. The Sponsor may create additional Units of a Portfolio by depositing into the Portfolio additional stocks or cash with instructions to purchase additional stocks. A deposit could result in a dilution of your investment and anticipated income because of fluctuations in the price of the stocks between the time of the deposit and the purchase of the stocks and because the Portfolio will pay brokerage or acquisition fees.

Voting. Only the Trustee may sell or vote the stocks in a Portfolio. While you may sell or redeem your Units, you may not sell or vote the stocks in your Portfolio. The Sponsor will instruct the Trustee how to vote the stocks. The Trustee will vote the stocks in the same general proportion as shares held by other shareholders if the Sponsor fails to provide instructions.

SPONSOR INFORMATION

Invesco Capital Markets, Inc. is the Sponsor of your Portfolio. The Sponsor is a wholly owned subsidiary of Invesco Advisers, Inc. ("Invesco Advisers"). Invesco Advisers is an indirect wholly owned subsidiary of Invesco Ltd., a leading independent global investment manager that provides a wide range of investment strategies and vehicles to its retail, institutional and high net worth clients

around the globe. The Sponsor's principal office is located at 11 Greenway Plaza, Houston, Texas 77046-1173. As of December 31, 2017, the total stockholders' equity of Invesco Capital Markets, Inc. was \$100,102,806.15 (unaudited). The current assets under management and supervision by Invesco Ltd. and its affiliates were valued at approximately \$937.6 billion as of December 31, 2017. (This paragraph relates only to the Sponsor and not to your Portfolio or to any other Series thereof. The information is included herein only for the purpose of informing investors as to the financial responsibility of the Sponsor and its ability to carry out its contractual obligations. More detailed financial information will be made available by the Sponsor upon request).

The Sponsor and your Portfolio have adopted a code of ethics requiring Invesco Ltd.'s employees who have access to information on Portfolio transactions to report personal securities transactions. The purpose of the code is to avoid potential conflicts of interest and to prevent fraud, deception or misconduct with respect to your Portfolio.

If the Sponsor shall fail to perform any of its duties under the Trust Agreement or become incapable of acting or shall become bankrupt or its affairs are taken over by public authorities, then the Trustee may (i) appoint a successor Sponsor at rates of compensation deemed by the Trustee to be reasonable and not exceeding amounts prescribed by the SEC, (ii) terminate the Trust Agreement and liquidate the Portfolios as provided therein or (iii) continue to act as Trustee without terminating the Trust Agreement.

TRUSTEE INFORMATION

The Trustee is The Bank of New York Mellon, a trust company organized under the laws of New York. The Bank of New York Mellon has its principal unit investment trust division offices at 2 Hanson Place, 12th Floor, Brooklyn, New York 11217, (800) 856-8487. The Bank of New York Mellon is subject to supervision and examination by the Superintendent of Banks of the State of New York and the Board of Governors of the Federal Reserve System, and its deposits are insured by the Federal Deposit Insurance Corporation to the extent permitted by law.

The duties of the Trustee are primarily ministerial in nature. It did not participate in the selection of Securities for the Portfolios.

In accordance with the Trust Agreement, the Trustee shall keep proper books of record and account of all transactions at its office for each Portfolio. Such records shall include the name and address of, and the number of Units of each Portfolio held by, every Unitholder. Such books and records shall be open to inspection by any Unitholder at all reasonable times during the usual business hours. The Trustee shall make such annual or other reports as may from time to time be required under any applicable state or federal statute, rule or regulation. The Trustee is required to keep a certified copy or duplicate original of the Trust Agreement on file in its office available for inspection at all reasonable times during the usual business hours by any Unitholder, together with a current list of the Securities held in each Portfolio.

Under the Trust Agreement, the Trustee or any successor trustee may resign and be discharged of its responsibilities created by the Trust Agreement by executing an instrument in writing and filing the same with the Sponsor. The Trustee or successor trustee must mail a copy of the notice of resignation to all Unitholders then of record, not less than 60 days before the date specified in such notice when such resignation is to take effect. The Sponsor upon receiving notice of such resignation is obligated to appoint a successor trustee promptly. If, upon such resignation, no successor trustee has been appointed and has accepted the appointment within 30 days after notification, the retiring Trustee may apply to a court of competent jurisdiction for the appointment of a successor. The Sponsor may remove the Trustee and appoint a successor trustee as provided in the Trust Agreement at any time with or without cause. Notice of such removal and appointment shall be mailed to each Unitholder by the Sponsor. Upon execution of a written acceptance of such appointment by such successor trustee, all the rights, powers, duties and obligations of the original trustee shall vest in the successor. The resignation or removal of a Trustee becomes effective only when the successor trustee accepts its appointment as such or when a court of competent jurisdiction appoints a successor trustee.

Any corporation into which a Trustee may be merged or with which it may be consolidated, or any corporation resulting from any merger or consolidation to which a Trustee shall be a party, shall be the successor trustee. The Trustee must be a banking corporation organized under the laws of the United States or any state and having at all times an aggregate capital, surplus and undivided profits of not less than \$5,000,000.

TAXATION

The prospectus contains a discussion of certain U.S. federal income tax issues concerning the Portfolios and the purchase, ownership and disposition of Portfolio Units. The discussion below supplements the prospectus discussion and is qualified in its entirety by the prospectus discussion. Prospective investors should consult their own tax advisors with regard to the federal tax consequences of the purchase, ownership, or disposition of Portfolio Units, as well as the tax consequences arising under the laws of any state, locality, non-U.S. country, or other taxing jurisdiction.

The federal income tax summary below and in the prospectus is based in part on the advice of counsel to the Sponsor. The Internal Revenue Service could disagree with any conclusions set forth in these discussions. In addition, our counsel was not asked to review, and has not reached a conclusion with respect to the federal income tax treatment of the assets to be held by the Portfolios.

The Portfolios intend to elect and to qualify annually as a regulated investment company under the Internal Revenue Code of 1986, as amended (the "Code") and to comply with applicable distribution requirements so that it will not pay federal income tax on income and capital gains distributed to its Unitholders.

To qualify for the favorable U.S. federal income tax treatment generally accorded to regulated investment companies, the Portfolio must, among other things, (a) derive in each taxable year at least 90% of its gross income from dividends, interest, payments with respect to securities loans and gains from the sale or other disposition of stock, securities or foreign currencies or other income derived with respect to its business of

investing in such stock, securities or currencies, and net income from qualified publicly traded partnerships; (b) diversify its holdings so that, at the end of each quarter of the taxable year, (i) at least 50% of the market value of the Portfolio's assets is represented by cash and cash items (including receivables), U.S. government securities, the securities of other regulated investment companies and other securities, with such other securities of any one issuer generally limited for the purposes of this calculation to an amount not greater than 5% of the value of the Portfolio's total assets and not greater than 10% of the outstanding voting securities of such issuer, and (ii) not more than 25% of the value of its total assets is invested in the securities (other than U.S. government securities or the securities of other regulated investment companies) of any one issuer, or two or more issuers which the Portfolio controls (by owning 20% or more of the issuer's outstanding voting securities) and which are engaged in the same, similar or related trades or businesses, or the securities of qualified publicly traded partnerships; and (c) distribute at least 90% of its investment company taxable income (which includes, among other items, dividends, interest and net short-term capital gains in excess of net long-term capital losses but excludes net capital gain, if any) and at least 90% of its net tax-exempt interest income, if any, each taxable year.

As a regulated investment company, the Portfolio generally will not be subject to U.S. federal income tax on its investment company taxable income (as that term is defined in the Code, but without regard to the deduction for dividends paid) and net capital gain (the excess of net long-term capital gain over net short-term capital loss), if any, that it distributes to Unitholders. The Portfolio intends to distribute to its Unitholders, at least annually, substantially all of its investment company taxable income and net capital gain. If the Portfolio retains any net capital gain or investment company taxable income, it will generally be subject to federal income tax at regular corporate rates on the amount retained. In addition, amounts not distributed on a timely basis in accordance with a calendar year distribution requirement are subject to a nondeductible 4% excise tax unless, generally, the Portfolio distributes during each

calendar year an amount equal to the sum of (1) at least 98% of its ordinary income (not taking into account any capital gains or losses) for the calendar year, (2) at least 98.2% of its capital gains in excess of its capital losses (adjusted for certain ordinary losses) for the one-year period ending October 31 of the calendar year, and (3) any ordinary income and capital gains for previous years that were not distributed or taxed during those years. To prevent application of the excise tax, the Portfolio intends to make its distributions in accordance with the calendar year distribution requirement. Further, if the Portfolio retains any net capital gain, the Portfolio may designate the retained amount as undistributed capital gains in a notice to Unitholders who, if subject to federal income tax on long-term capital gains (i) will be required to include in income for federal income tax purposes, as long-term capital gain, their share of such undistributed amount, and (ii) will be entitled to credit their proportionate share of the tax paid by the Portfolio against their federal income tax liabilities, if any, and to claim refunds to the extent the credit exceeds such liabilities. A distribution will be treated as paid on December 31 of the current calendar year if it is declared by the Portfolio in October, November or December with a record date in such a month and paid by the Portfolio during January of the following calendar year. These distributions will be taxable to Unitholders in the calendar year in which the distributions are declared, rather than the calendar year in which the distributions are received. There is no assurance that distributions made by your Portfolio will be sufficient to eliminate all taxes on the Portfolio for all periods. Your Portfolio may make taxable distributions to you even during periods in which the value of your Units has declined.

If a Portfolio failed to qualify as a regulated investment company or failed to satisfy the 90% distribution requirement in any taxable year, the Portfolio would be taxed as an ordinary corporation on its taxable income (even if such income were distributed to its Unitholders) and all distributions out of earnings and profits would be taxable to Unitholders as ordinary dividend income.

Your Portfolio may be required to withhold as backup withholding federal income tax at the backup withholding rate on all taxable distributions payable to

you if you fail to provide your correct taxpayer identification number or to make required certifications, or if the IRS indicates that you are subject to backup withholding. Backup withholding is not an additional tax. Any amounts withheld may be credited against your federal income tax liability if you provide the required information or certification.

If a Portfolio is treated as holding directly or indirectly 10 percent or more of the combined value or voting power of the stock of a foreign corporation, and all U.S. shareholders collectively own more than 50 percent of the vote or value of the stock of such corporation, the foreign corporation may be treated as a “controlled foreign corporation” (a “CFC”) for U.S. federal income tax purposes. In such circumstances, your Portfolio will be required to include certain types of passive income and certain other types of income relating to insurance, sales and services with related parties and oil related income in the Portfolio’s taxable income whether or not such income is distributed.

If a Portfolio holds an equity interest in any “passive foreign investment companies” (“PFICs”), which are generally certain foreign corporations that receive at least 75% of their annual gross income from passive sources (such as interest, dividends, certain rents and royalties or capital gains) or that hold at least 50% of their assets in investments producing such passive income, the Portfolio could be subject to U.S. federal income tax and additional interest charges on gains and certain distributions with respect to those equity interests, even if all the income or gain is timely distributed to its Unitholders. Your Portfolio will not be able to pass through to its Unitholders any credit or deduction for such taxes. Your Portfolio may be able to make an election that could ameliorate these adverse tax consequences. In this case, your Portfolio would recognize as ordinary income any increase in the value of such PFIC shares, and as ordinary loss any decrease in such value to the extent it did not exceed prior increases included in income. Under this election, your Portfolio might be required to recognize in a year income in excess of its distributions from PFICs and its proceeds from dispositions of PFIC stock during that year, and such income would nevertheless be subject

to the distribution requirement and would be taken into account for purposes of the 4% excise tax (described above). Dividends paid by PFICs will not be treated as qualified dividend income.

PORTFOLIO TERMINATION

A Portfolio may be liquidated at any time by consent of Unitholders representing 66 2/3% of the Units of such Portfolio then outstanding or by the Trustee when the value of the Securities owned by a Portfolio, as shown by any evaluation, is less than \$500,000 (\$3,000,000 if the value of the Portfolio has exceeded \$15,000,000). A Portfolio will be liquidated by the Trustee in the event that a sufficient number of Units of such Portfolio not yet sold are tendered for redemption by the Sponsor, so that the net worth of such Portfolio would be reduced to less than 40% of the value of the Securities at the time they were deposited in such Portfolio. If a Portfolio is liquidated because of the redemption of unsold Units by the Sponsor, the Sponsor will refund to each purchaser of Units the entire sales charge paid by such purchaser. The Trust Agreement will terminate upon the sale or other disposition of the last Security held thereunder, but in no event will it continue beyond the Mandatory Termination Date.

Commencing during the period beginning nine business days prior to, and no later than, the Mandatory Termination Date, Securities will begin to be sold in connection with the termination of the Portfolios. The Sponsor will determine the manner, timing and execution of the sales of the Securities. The Sponsor shall direct the liquidation of the Securities in such manner as to effectuate orderly sales and a minimal market impact. In the event the Sponsor does not so direct, the Securities shall be sold within a reasonable period and in such manner as the Trustee, in its sole discretion, shall determine. Unitholders will receive a cash distribution from the sale of the remaining Securities within a reasonable time following the Mandatory Termination Date. The Trustee will deduct from the funds of the appropriate Portfolio any accrued costs, expenses, advances or indemnities provided by the Trust Agreement, including estimated compensation of the Trustee, costs of liquidation and any amounts required as a reserve to provide for payment of any

applicable taxes or other governmental charges. Any sale of Securities in a Portfolio upon termination may result in a lower amount than might otherwise be realized if such sale were not required at such time. The Trustee will then distribute to each Unitholder of each Portfolio his pro rata share of the balance of the Income and Capital Accounts of such Portfolio.

The Sponsor may, but is not obligated to, offer for sale units of a subsequent series of the Portfolios pursuant to the Rollover option. There is, however, no assurance that units of any new series of the Portfolios will be offered for sale at that time, or if offered, that there will be sufficient units available for sale to meet the requests of any or all Unitholders.

Within 60 days of the final distribution Unitholders will be furnished a final distribution statement of the amount distributable. At such time as the Trustee in its sole discretion will determine that any amounts held in reserve are no longer necessary, it will make distribution thereof to Unitholders in the same manner.

U-EMSSUP1856
