

INVESCO UNIT TRUSTS SERIES
(each a “Trust”)

Supplement

Notwithstanding anything to the contrary in the Registration Statement for each Trust, commencing May 1, 2024, Invesco Capital Markets, Inc, which serves as the Sponsor of each Trust, will assume the role of Evaluator and will be responsible for the determination of the values of the Securities held in each Trust and the price per Unit of each Trust. Prior to May 1, 2024, the Bank of New York Mellon was responsible for such determinations.

Supplement Dated: April 30, 2024

U-EMSSPT043024

Closed-End Strategy: Senior Loan and Limited Duration Portfolio 2024-2

Closed-End Strategy: Select Opportunity Portfolio 2024-2

The unit investment trusts named above (the “Portfolios”), included in Invesco Unit Trusts, Series 2353, each invest in a portfolio of closed-end investment companies (known as “closed-end funds”). Of course, we cannot guarantee that a Portfolio will achieve its objective.

An investment can be made in the underlying funds directly rather than through a Portfolio. These direct investments can be made without paying a Portfolio’s sales charge, operating expenses and organization costs.

April 3, 2024

You should read this prospectus and retain it for future reference.

The Securities and Exchange Commission has not approved or disapproved of the Units or passed upon the adequacy or accuracy of this prospectus.

Any contrary representation is a criminal offense.

Closed-End Strategy: Senior Loan and Limited Duration Portfolio

Investment Objective. The Portfolio seeks to provide current income and the potential for capital appreciation.

Principal Investment Strategy. The Portfolio seeks to achieve its objective by investing in a portfolio primarily consisting of common stock of closed-end investment companies (known as “closed-end funds”) that invest in senior corporate loans or other debt securities of limited duration. “Duration” is a measure of the sensitivity of a debt security’s price to changes in interest rates, expressed in years. Higher durations signify greater price volatility. Invesco Capital Markets, Inc. is the Sponsor of the Portfolio.

In selecting securities for the Portfolio, the Sponsor sought to invest in funds representative of asset classes with generally attractive senior loan and limited duration income opportunities. In addition, the Sponsor assembled the final portfolio based on consideration of factors including, but not limited to:

- Manager Performance – Performance relative to its benchmark and peer group
- Valuation – Premium/Discount to net asset value relative to itself and its peer group
- Dividend – Current dividend level and sustainability
- Diversification – Analysis of asset class mix
- Credit Quality – Analysis of fixed income holdings
- Liquidity – Analysis of fund trading volume

None of the closed-end funds in the Portfolio are funds classified as “non-diversified” under the Investment Company Act of 1940. These funds have the ability to invest a greater portion of their assets in obligations of a single issuer. As a result, these funds may be more susceptible to volatility than a more diversified fund.

Of course, we cannot guarantee that your Portfolio will achieve its objective. The value of your Units may fall below the price you paid for the Units. You should read the “Risk Factors” section before you invest.

The Portfolio is designed as part of a long-term investment strategy. The Sponsor may offer a subsequent series of the portfolio when the current Portfolio terminates. As a result, you may achieve more consistent overall results by following the strategy through reinvestment of your proceeds over several years if subsequent series are available. Repeatedly rolling over an investment in a unit investment trust may differ from long-term investments in other investment products when considering the sales charges, fees, expenses and tax consequences attributable to a Unitholder. For more information see “Rights of Unitholders--Rollover”.

Principal Risks. As with all investments, you can lose money by investing in this Portfolio. The Portfolio also might not perform as well as you expect. This can happen for reasons such as these:

- **Security prices will fluctuate.** The value of your investment may fall over time.
- **The Portfolio invests in shares of closed-end funds.** You should understand the section titled “Closed-End Funds” before you invest. In particular, shares of these funds tend to trade at a discount from their net asset value and are subject to risks related to factors such as management’s ability to achieve a fund’s objective, market conditions affecting a fund’s investments and use of leverage. The underlying funds have management and operating expenses. You will bear not only your share of the Portfolio’s expenses, but also the expenses of the underlying funds. By investing in other funds, the Portfolio incurs greater expenses than you would incur if you invested directly in the funds.

- **The value of fixed income securities in the closed-end funds will generally fall if interest rates rise.** In a low interest rate environment risks associated with rising rates are heightened. The negative impact on fixed income securities from any interest rate increases could be swift and significant. No one can predict whether interest rates will rise or fall in the future.
- **In the future, a closed-end fund may be unable or unwilling to make dividend payments, and senior loan borrowers may be unable to make payments of interest or principal.** Any of these events may reduce the level of dividends a closed-end fund pays which would reduce your income and cause the value of your Units to fall.
- **The financial condition of a loan borrower may worsen or its credit ratings may drop, affecting the value of a closed-end fund held by the Portfolio and resulting in a reduction in the value of your Units.** This may occur at any point in time, including during the primary offering period.
- **You could experience dilution of your investment if the size of the Portfolio is increased as Units are sold.** There is no assurance that your investment will maintain its proportionate share in the Portfolio's profits and losses.
- **The closed-end funds held by the Portfolio invest in senior loans.** Although senior loans in which the closed-end funds invest may be secured by specific collateral, there can be no assurance that liquidation of collateral would satisfy the borrower's obligation in the event of non-payment of scheduled principal or interest or that such collateral could be readily liquidated. Senior loans in which the closed-end funds invest generally are of below investment grade credit quality, may be unrated at the time of investment, generally are not registered with the Securities and Exchange Commission or any state securities commission, and generally are not listed on any securities exchange. In addition, the amount of public information available on senior loans generally is less extensive than that available for other types of assets.
- **The yield on closed-end funds investing in senior loans may fluctuate with changes in interest rates.** Generally, yields on senior loans decline in a falling interest rate environment and increase in a rising interest rate environment. Because interest rates on senior loans are reset periodically, an increase in interest rates may not be immediately reflected in the rates of the loans.
- **Certain closed-end funds in the Portfolio invest in corporate bonds.** Corporate bonds are debt obligations of a corporation, and as a result are generally subject to the various economic, political, regulatory, competitive and other such risks that may affect an issuer. Like other fixed income securities, corporate bonds generally decline in value with increases in interest rates. During periods of market turbulence, corporate bonds may experience illiquidity and volatility. During such periods, there can be uncertainty in assessing the financial condition of an issuer. As a result, the ratings of the bonds in certain closed-end funds in the Portfolio may not accurately reflect an issuer's current financial condition, prospects, or the extent of the risks associated with investing in such issuer's securities.
- **The closed-end funds may invest in securities rated below investment grade and considered to be "junk" or "high-yield" securities.** Securities rated below "BBB-" by Standard & Poor's or below "Baa3"

by Moody's are considered to be below investment grade. These securities are considered to be speculative and are subject to greater market and credit risks. Accordingly, the risk of default is higher than with investment grade securities. In addition, these securities may be more sensitive to interest rate changes and may be more likely to make early returns of principal.

- **Certain of the closed-end funds in the Portfolio invest in securities of foreign issuers, presenting risks beyond those of U.S. issuers.** These risks may include market and political factors related to an issuer's foreign market, international trade conditions, less regulation, smaller or less liquid markets, increased volatility, differing accounting and tax practices and changes in the value of foreign currencies which may have both economic and tax consequences.
- **We do not actively manage the Portfolio.** While the closed-end funds have managed portfolios, except in limited circumstances, the Portfolio will hold, and may continue to buy, shares of the same funds even if their market value declines.

Fee Table

The amounts below are estimates of the direct and indirect expenses that you may incur based on a \$10 Public Offering Price per Unit. Actual expenses may vary.

Sales Charge	As a % of Public Offering Price	Amount Per 100 Units
Initial sales charge	0.000%	\$ 0.000
Deferred sales charge	2.250	22.500
Creation and development fee	0.500	5.000
Maximum sales charge	<u>2.750%</u>	<u>\$27.500</u>
	As a % of Net Assets	Amount Per 100 Units
Estimated Organization Costs	0.673%	\$ 6.500
Estimated Annual Expenses		
Trustee's fee and operating expenses	0.203%	\$ 1.962
Supervisory, bookkeeping and administrative fees	0.057	0.550
Underlying fund expenses	4.260	41.153
Total	<u>4.520%</u>	<u>\$43.665*</u>

Example

This example helps you compare the cost of the Portfolio with other unit trusts and mutual funds. In the example we assume that the expenses do not change and that the Portfolio's annual return is 5%. Your actual returns and expenses will vary. This example also assumes that you continue to follow the Portfolio strategy and roll your investment, including all distributions, into a new trust every two years subject to a sales charge of 2.75%. Based on these assumptions, you would pay the following expenses for every \$10,000 you invest in the Portfolio:

1 year	\$ 777
3 years	1,955
5 years	3,100
10 years	5,676

* The estimated annual expenses are based upon the estimated trust size for the Portfolio determined as of the initial date of deposit. Because certain of the operating expenses are fixed amounts, if the Portfolio does not reach the estimated size, or if the value of the Portfolio or number of outstanding units decline over the life of the trust, or if the actual amount of the operating expenses exceeds the estimated amounts, the actual amount of the operating expenses per 100 units would exceed the estimated amounts. In some cases, the actual amount of operating expenses may substantially differ from the amounts reflected above.

The maximum sales charge is 2.75% of the Public Offering Price per Unit. There is no initial sales charge at a Public Offering Price of \$10 or less. If the Public Offering Price exceeds \$10 per Unit, the initial sales charge is the difference between the total sales charge (maximum of 2.75% of the Public Offering Price) and the sum of the remaining deferred sales charge and the creation and development fee. The deferred sales charge is fixed at \$0.225 per Unit and accrues daily from August 10, 2024 through January 9, 2025. Your Portfolio pays a proportionate amount of this charge on the 10th day of each month beginning in the accrual period until paid in full. The combination of the initial and deferred sales charges comprises the "transactional sales charge". The creation and development fee is fixed at \$0.05 per unit and is paid at the earlier of the end of the initial offering period (anticipated to be three months) or six months following the Initial Date of Deposit. For more detail, see "Public Offering Price - General."

Although not an actual operating expense, the Portfolio, and therefore the Unitholders, will indirectly bear the operating expenses of the funds held by the Portfolio in the estimated amount provided above. Estimated fund expenses are based upon the net asset value of the number of fund shares held by the Portfolio per Unit multiplied by the annual operating expenses of the funds for the most recent fiscal year. The Trustee or Sponsor will waive fees otherwise payable by the Portfolio in an amount equal to any 12b-1 fees or other compensation the Trustee, the Sponsor or an affiliate receives from the funds in connection with the Portfolio's investment in the funds, including license fees receivable by an affiliate of the Sponsor from a fund.

Essential Information

Unit Price at Initial Date of Deposit	\$10.0000
Initial Date of Deposit	April 3, 2024
Mandatory Termination Date	April 10, 2026
Historical 12 Month Distributions^{1,2}	\$0.9816 per Unit
Record Dates²	10th day of each month
Distribution Dates²	25th day of each month
CUSIP Numbers	Cash – 46149F143 Reinvest – 46149F150 Fee Based Cash – 46149F168 Fee Based Reinvest – 46149F176

1 As of close of business day prior to Initial Date of Deposit. The actual distributions you receive will vary from this per Unit amount due to changes in the Portfolio's fees and expenses, in actual income received by the Portfolio, currency fluctuations and with changes in the Portfolio such as the acquisition or liquidation of securities. See "Rights of Unitholders--Historical and Estimated Distributions."

2 The Trustee will make distributions of income and capital on each monthly Distribution Date to Unitholders of record on the preceding Record Date, provided that the total cash held for distribution equals at least \$0.01 per Unit. Undistributed income and capital will be distributed in the next month in which the total cash held for distribution equals at least \$0.01 per Unit.

Closed-End Strategy: Senior Loan and Limited Duration Portfolio 2024-2

Portfolio

13,562			\$ 148,711.51

See "Notes to Portfolios".

Closed-End Strategy: Select Opportunity Portfolio

Investment Objective. The Portfolio seeks to provide current income and the potential for capital appreciation.

Principal Investment Strategy. The Portfolio seeks to achieve its objective by investing in a portfolio consisting of common stocks of closed-end investment companies (known as “closed-end funds”) that invest in various global fixed income and equity securities. As indicated by information publicly available at the time of selection, none of the Portfolio’s closed-end funds employed “structural leverage” through the issuance of preferred shares or debt securities. Structural leverage affects a closed-end fund’s capital structure by increasing the fund’s portfolio assets. The closed-end funds included in the Portfolio may invest in a wide range of sectors and strategies such as global bonds, global equities, high-yield bonds, real estate, covered calls, and other total return strategies. Invesco Capital Markets, Inc. is the Sponsor of the Portfolio.

In selecting the closed-end funds for the Portfolio, the Sponsor sought to invest in funds representative of asset classes with generally attractive income opportunities. In addition, the Sponsor assembled the final portfolio based on consideration of factors including, but not limited to:

- Manager Performance – Performance relative to its benchmark and peer group
- Valuation – Premium/Discount to net asset value relative to itself and its peer group
- Dividend – Current dividend level and sustainability
- Diversification – Analysis of asset class mix
- Credit Quality – Analysis of fixed income holdings
- Liquidity – Analysis of fund trading volume

It is possible that some or all of the Portfolio’s closed-end funds may have utilized structural leverage in the past and may elect to utilize structural leverage in the future if their investment policy allows for it. In addition, some of the closed-end funds selected for the Portfolio

may employ “portfolio leverage”, which results from a fund’s investment in derivative investments that are inherently leveraged. The use of structural leverage by closed-end funds can increase the likelihood of share price and net asset value (“NAV”) volatility and can add additional systematic risk to a closed-end fund’s underlying portfolio.

Approximately 29% of the Portfolio consists of funds that are classified as “non-diversified” under the Investment Company Act of 1940. These funds have the ability to invest a greater portion of their assets in obligations of a single issuer. As a result, these funds may be more susceptible to volatility than a more widely diversified fund.

Of course, we cannot guarantee that your Portfolio will achieve its objective. The value of your Units may fall below the price you paid for the Units. You should read the “Risk Factors” section before you invest.

The Portfolio is designed as part of a long-term investment strategy. The Sponsor may offer a subsequent series of the portfolio when the current Portfolio terminates. As a result, you may achieve more consistent overall results by following the strategy through reinvestment of your proceeds over several years if subsequent series are available. Repeatedly rolling over an investment in a unit investment trust may differ from long-term investments in other investment products when considering the sales charges, fees, expenses and tax consequences attributable to a Unitholder. For more information see “Rights of Unitholders--Rollover”.

Principal Risks. As with all investments, you can lose money by investing in this Portfolio. The Portfolio also might not perform as well as you expect. This can happen for reasons such as these:

- **Security prices will fluctuate.** The value of your investment may fall over time.
- **The Portfolio invests in shares of closed-end funds.** You should understand the section titled “Closed-End Funds” before you invest. In particular, shares of these funds tend to trade at

a discount from their net asset value and are subject to risks related to factors such as management's ability to achieve a fund's objective, market conditions affecting a fund's investments and use of leverage, if any. The underlying funds have management and operating expenses. You will bear not only your share of the Portfolio's expenses, but also the expenses of the underlying funds. By investing in other funds, the Portfolio incurs greater expenses than you would incur if you invested directly in the funds.

- **You could experience dilution of your investment if the size of the Portfolio is increased as Units are sold.** There is no assurance that your investment will maintain its proportionate share in the Portfolio's profits and losses.
- **The value of fixed income securities in the closed-end funds will generally fall if interest rates rise.** In a low interest rate environment risks associated with rising rates are heightened. The negative impact on fixed income securities from any interest rate increases could be swift and significant. No one can predict whether interest rates will rise or fall in the future.
- **Certain of the closed-end funds may invest in securities rated below investment grade and considered to be "junk" or "high-yield" securities.** Securities rated below "BBB-" by Standard & Poor's or below "Baa3" by Moody's are considered to be below investment grade. These securities are considered to be speculative and are subject to greater market and credit risks. Accordingly, the risk of default is higher than with investment grade securities. In addition, these securities may be more sensitive to interest rate changes and may be more likely to make early returns of principal.
- **Certain closed-end funds in the Portfolio invest in corporate bonds.** Corporate bonds are debt obligations of a corporation, and as a result are generally subject to the various economic, political, regulatory, competitive and other such risks that may affect an issuer. Like other fixed income securities, corporate bonds generally decline in value with increases in interest rates. During periods of market turbulence, corporate bonds may experience illiquidity and volatility. During such periods, there can be uncertainty in assessing the financial condition of an issuer. As a result, the ratings of the bonds in certain closed-end funds in the Portfolio may not accurately reflect an issuer's current financial condition, prospects, or the extent of the risks associated with investing in such issuer's securities.
- **A security issuer may be unable to make payments of interest, dividends or principal in the future.** This may reduce the level of dividends a closed-end fund pays which would reduce your income and cause the value of your Units to fall.
- **The financial condition of a security issuer may worsen or its credit ratings may drop, resulting in a reduction in the value of your Units.** This may occur at any point in time, including during the primary offering period.
- **Certain of the closed-end funds in the Portfolio invest in securities of foreign issuers, presenting risks beyond those of U.S. issuers.** These risks may include market and political factors related to an issuer's foreign market, international trade conditions, less regulation, smaller or less liquid markets, increased volatility, differing accounting and tax practices and changes in the value of foreign currencies which may have both economic and tax consequences.

- **The Portfolio invests significantly in closed-end funds that write call options on their assets.** The use of options may require an underlying fund to sell portfolio securities at inopportune times or at prices other than current market values, may limit the amount of appreciation a fund can realize on an investment, or may cause a fund to hold a security it might otherwise sell. To the extent an underlying fund purchases options pursuant to a hedging strategy, the fund could lose its entire investment in the option.
- **We do not actively manage the Portfolio.** Except in limited circumstances, the Portfolio will hold, and may continue to buy, shares of the same securities even if their market value declines.

Fee Table

The amounts below are estimates of the direct and indirect expenses that you may incur based on a \$10 Public Offering Price per Unit. Actual expenses may vary.

Sales Charge	As a % of Public Offering Price	Amount Per 100 Units
Initial sales charge	0.000%	\$ 0.000
Deferred sales charge	2.250	22.500
Creation and development fee	0.500	5.000
Maximum sales charge	<u>2.750%</u>	<u>\$27.500</u>
	As a % of Net Assets	Amount Per 100 Units
Estimated Organization Costs	0.673%	\$ 6.500
Estimated Annual Expenses		
Trustee's fee and operating expenses	0.210%	\$ 2.028
Supervisory, bookkeeping and administrative fees	0.054	0.526
Underlying fund expenses	1.170	11.305
Total	<u>1.434%</u>	<u>\$13.859*</u>

Example

This example helps you compare the cost of the Portfolio with other unit trusts and mutual funds. In the example we assume that the expenses do not change and that the Portfolio's annual return is 5%. Your actual returns and expenses will vary. This example also assumes that you continue to follow the Portfolio strategy and roll your investment, including all distributions, into a new trust approximately every two years subject to a sales charge of 2.75%. Based on these assumptions, you would pay the following expenses for every \$10,000 you invest in the Portfolio:

1 year	\$ 479
3 years	1,113
5 years	1,769
10 years	3,311

* The estimated annual expenses are based upon the estimated trust size for the Portfolio determined as of the initial date of deposit. Because certain of the operating expenses are fixed amounts, if the Portfolio does not reach the estimated size, or if the value of the Portfolio or number of outstanding units decline over the life of the trust, or if the actual amount of the operating expenses exceeds the estimated amounts, the actual amount of the operating expenses per 100 units would exceed the estimated amounts. In some cases, the actual amount of operating expenses may substantially differ from the amounts reflected above.

The maximum sales charge is 2.75% of the Public Offering Price per Unit. There is no initial sales charge at a Public Offering Price of \$10 or less. If the Public Offering Price exceeds \$10 per Unit, the initial sales charge is the difference between the total sales charge (maximum of 2.75% of the Public Offering Price) and the sum of the remaining deferred sales charge and the creation and development fee. The deferred sales charge is fixed at \$0.225 per Unit and accrues daily from November 10, 2024 through April 9, 2025. Your Portfolio pays a proportionate amount of this charge on the 10th day of each month beginning in the accrual period until paid in full. The combination of the initial and deferred sales charges comprises the "transactional sales charge". The creation and development fee is fixed at \$0.05 per unit and is paid at the earlier of the end of the initial offering period anticipated to be six months following the Initial Date of Deposit. For more detail, see "Public Offering Price - General."

Although not an actual operating expense, the Portfolio, and therefore the Unitholders, will indirectly bear the operating expenses of the funds held by the Portfolio in the estimated amount provided above. Estimated fund expenses are based upon the net asset value of the number of fund shares held by the Portfolio per Unit multiplied by the annual operating expenses of the funds for the most recent fiscal year. The Trustee or Sponsor will waive fees otherwise payable by the Portfolio in an amount equal to any 12b-1 fees or other compensation the Trustee, the Sponsor or an affiliate receives from the funds in connection with the Portfolio's investment in the funds, including license fees receivable by an affiliate of the Sponsor from a fund.

Notes to Portfolio

- (1) The Securities are initially represented by “regular way” contracts to purchase the Securities. A letter of credit has been deposited with the Trustee covering the funds necessary for the purchase of the Securities as of the close of business on the last business day prior to the inception date of the Portfolio. The Sponsor has instructed the Trustee to purchase the securities on behalf of the Portfolio at the opening of business on the inception date of the Portfolio and are expected to settle within two business days (see “The Portfolio”).
 - (2) The valuation of the Securities has been determined by the Trustee as of the close of business on the last business day prior to the inception date of the Portfolio. In accordance with Financial Accounting Standards Board Accounting Standards Codification 820, “Fair Value Measurement,” the Portfolio’s investments are classified as Level 1, which refers to securities traded in an active market.
- “*” The investment advisor of this fund is an affiliate of the Sponsor.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Sponsor and Unitholders of Invesco Unit Trusts, Series 2353:

Opinion on the Financial Statements

We have audited the accompanying statements of condition (including the related portfolio schedules) of Closed-End Strategy: Senior Loan and Limited Duration Portfolio 2024-2 and Closed-End Strategy: Select Opportunity Portfolio 2024-2 (included in Invesco Unit Trusts, Series 2353 (the "Trust")) as of April 3, 2024, and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Trust as of April 3, 2024, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of Invesco Capital Markets, Inc., the Sponsor. Our responsibility is to express an opinion on the Trust's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Trust in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Trust is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by the Sponsor, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of cash or irrevocable letters of credit deposited for the purchase of securities as shown in the statements of condition as of April 3, 2024 by correspondence with The Bank of New York Mellon, Trustee. We believe that our audits provide a reasonable basis for our opinion.

GRANT THORNTON LLP

We have served as the auditor of one or more of the unit investment trusts, sponsored by Invesco Capital Markets, Inc. and its predecessors, since 1976.

New York, New York
April 3, 2024

STATEMENTS OF CONDITION
As of April 3, 2024

	Closed-End Strategy: Senior Loan and Limited Duration Portfolio	Closed-End Strategy: Select Opportunity Portfolio
INVESTMENT IN SECURITIES		
Contracts to purchase Securities (1)	\$ 148,712	\$ 148,869
Total	\$ 148,712	\$ 148,869
LIABILITIES AND INTEREST OF UNITHOLDERS		
Liabilities--		
Organization costs (2)	\$ 967	\$ 968
Deferred sales charge liability (3)	3,346	3,350
Creation and development fee liability (4)	744	744
Interest of Unitholders--		
Cost to investors (5)	148,712	148,869
Less: deferred sales charge, creation and development fee and organization costs (2)(4)(5)(6)	5,057	5,062
Net interest to Unitholders (5)	143,655	143,807
Total	\$ 148,712	\$ 148,869
Units outstanding	14,872	14,887
Net asset value per Unit	\$ 9.660	\$ 9.660

- (1) The value of the Securities is determined by the Trustee on the bases set forth under "Public Offering--Unit Price". The contracts to purchase Securities are collateralized by an irrevocable letter of credit which has been deposited with the Trustee.
- (2) A portion of the Public Offering Price represents an amount sufficient to pay for all or a portion of the costs incurred in establishing the Portfolio. The amount of these costs are set forth in the "Fee Table". A distribution will be made as of the close of the initial offering period following the Initial Date of Deposit to an account maintained by the Trustee from which the organization expense obligation of the investors will be satisfied. To the extent that actual organization costs of the Portfolio are greater than the estimated amount, only the estimated organization costs added to the Public Offering Price will be reimbursed to the Sponsor and deducted from the assets of the Portfolio.
- (3) Represents the amount of mandatory distributions from the Portfolio on the bases set forth under "Public Offering".
- (4) The creation and development fee is payable by the Portfolio on behalf of Unitholders out of the assets of the Portfolio as of the close of the initial offering period. If Units are redeemed prior to the close of the initial public offering period, the fee will not be deducted from the proceeds.
- (5) The aggregate public offering price and the aggregate sales charge are computed on the bases set forth under "Public Offering".
- (6) Assumes the maximum sales charge.

THE PORTFOLIOS

The Portfolios were created under the laws of the State of New York pursuant to a Trust Indenture and Trust Agreement (the “Trust Agreement”), dated the date of this prospectus (the “Initial Date of Deposit”), among Invesco Capital Markets, Inc., as Sponsor, Invesco Investment Advisers LLC, as Supervisor, and The Bank of New York Mellon, as Trustee.

Each Portfolio offers investors the opportunity to purchase Units representing proportionate interests in a portfolio of securities. The Portfolios may be an appropriate medium for investors who desire to participate in a portfolio of securities with greater diversification than they might be able to acquire individually.

On the Initial Date of Deposit, the Sponsor deposited contracts to purchase Securities and an irrevocable letter of credit in the amount required for these purchases with the Trustee. In exchange for these contracts the Trustee delivered to the Sponsor documentation evidencing the ownership of Units of the Portfolios. Unless otherwise terminated as provided in the Trust Agreement, the Portfolios will terminate on the Mandatory Termination Date and any remaining Securities will be liquidated or distributed by the Trustee within a reasonable time. As used in this prospectus the term “Securities” means the securities (including contracts to purchase these securities) listed in each “Portfolio” and any additional securities deposited into a Portfolio.

Additional Units of a Portfolio may be issued at any time by depositing in the Portfolio (i) additional Securities, (ii) contracts to purchase Securities together with cash or irrevocable letters of credit or (iii) cash (or a letter of credit or the equivalent) with instructions to purchase additional Securities. As additional Units are issued by a Portfolio, the aggregate value of the Securities will be increased and the fractional undivided interest represented by each Unit may be decreased. The Sponsor may continue to make additional deposits into a Portfolio following the Initial Date of Deposit provided that the additional deposits will be in amounts which will maintain, as nearly as practicable, the same percentage relationship among the number of shares of each Security in such Portfolio that existed

immediately prior to the subsequent deposit. Investors may experience a dilution of their investments and a reduction in their anticipated income because of fluctuations in the prices of the Securities between the time of the deposit and the purchase of the Securities and because a Portfolio will pay the associated brokerage or acquisition fees. In addition, during the initial offering of Units it may not be possible to buy a particular Security due to regulatory or trading restrictions, or corporate actions. While such limitations are in effect, additional Units would be created by purchasing the Securities in the Portfolio that are not subject to those limitations. This would also result in the dilution of the investment in any such Security not purchased and potential variances in anticipated income. Purchases and sales of Securities by a Portfolio may impact the value of the Securities. This may especially be the case during the initial offering of Units, upon Portfolio termination and in the course of satisfying large Unit redemptions.

Each Unit of your Portfolio initially offered represents an undivided interest in the Portfolio. At the close of the New York Stock Exchange on the Initial Date of Deposit, the number of Units may be adjusted so that the Public Offering Price per Unit equals \$10. The number of Units, fractional interest of each Unit in your Portfolio and any historical or estimated per Unit distribution amount will increase or decrease to the extent of any adjustment. To the extent that any Units are redeemed to the Trustee or additional Units are issued as a result of additional Securities being deposited by the Sponsor, the fractional undivided interest in your Portfolio represented by each unredeemed Unit will increase or decrease accordingly, although the actual interest in the Portfolio will remain unchanged. Units will remain outstanding until redeemed upon tender to the Trustee by Unitholders, which may include the Sponsor, or until the termination of the Trust Agreement.

Each Portfolio consists of (a) the Securities (including contracts for the purchase thereof) listed under “Portfolio” as may continue to be held from time to time in a Portfolio, (b) any additional Securities acquired and held by a Portfolio pursuant to the provisions of the Trust Agreement and (c) any cash held in the related Income and Capital Accounts. Neither the Sponsor nor the

Trustee shall be liable in any way for any contract failure in any of the Securities.

OBJECTIVE AND SECURITIES SELECTION

The objective of the Portfolios is described in the Portfolio section. There is no assurance that a Portfolio will achieve its objective.

The Sponsor does not manage the Portfolios. You should note that the selection criteria were applied to the Securities for inclusion in the Portfolios prior to the Initial Date of Deposit. After this time, the Securities may no longer meet the selection criteria. Should a Security no longer meet the selection criteria, we will generally not remove the Security from the Portfolios. In offering the Units to the public, neither the Sponsor nor any broker-dealers are recommending any of the individual Securities but rather the entire pool of Securities in the Portfolios, taken as a whole, which are represented by the Units.

CLOSED-END FUNDS

Closed-end funds are a type of investment company that hold an actively managed portfolio of securities. Closed-end funds issue shares in “closed-end” offerings which generally trade on a stock exchange (although some closed-end fund shares are not listed on a securities exchange). The funds in the Portfolios all are currently listed on a securities exchange. Since closed-end funds maintain a relatively fixed pool of investment capital, portfolio managers may be better able to adhere to their investment philosophies through greater flexibility and control. In addition, closed-end funds don’t have to manage fund liquidity to meet potentially large redemptions.

Closed-end funds are subject to various risks, including management’s ability to meet the closed-end fund’s investment objective, and to manage the closed-end fund portfolio when the underlying securities are redeemed or sold, during periods of market turmoil and as investors’ perceptions regarding closed-end funds or their underlying investments change.

Shares of closed-end funds frequently trade at a discount from their net asset value in the secondary market. This risk is separate and distinct from the risk that

the net asset value of closed-end fund shares may decrease. The amount of such discount from net asset value is subject to change from time to time in response to various factors.

Closed-end funds in your Portfolio may employ structural leverage in the future if its investment policy allows for it. In general, a closed-end fund with the capability of employing structural leverage in its portfolio may do so through the issuance of preferred stock, debt securities, or through borrowing money for investment purposes. While structural leverage often serves to increase the yield of a closed-end fund, this leverage also subjects a closed-end fund to increased risks. These risks may include the likelihood of increased volatility and the possibility that the closed-end fund’s common share income will fall if the dividend rate on the preferred shares or the interest rate on any borrowings rises. The potential inability for a closed-end fund to employ the use of structural leverage effectively, due to disruptions in the market for the various instruments issued by closed-end funds or other factors, may result in an increase in borrowing costs and a decreased yield for a closed-end fund.

Closed-end funds are generally susceptible to the prospect of being converted into a different fund structure, including to that of an exchange-traded fund (“ETF”). Although ETF shares are also traded on an exchange, certain characteristics of ETFs are different from that of closed-end funds, including that ETFs do not typically have significant discounts or premiums. In the event that a closed-end fund in your Portfolio is expected to convert into an ETF, the Supervisor will determine whether your Portfolio should accept the ETF shares, or sell the affected closed-end shares and reinvest the proceeds pursuant to the related provisions in the Trust Agreement.

Certain of the funds in the Portfolios may be classified as “non-diversified” under the Investment Company Act of 1940. These funds have the ability to invest a greater portion of their assets in securities of a single issuer which could reduce diversification.

Only the Trustee may vote the shares of the closed-end funds held in the Portfolios. The Trustee will vote the shares in the same general proportion as shares held by other shareholders of each fund. The Portfolios

are generally required, however, to reject any offer for securities or other property in exchange for portfolio securities as described under “Portfolio Administration--Portfolio Administration.”

RISK FACTORS

All investments involve risk. This section describes the main risks that can impact the value of the securities in your Portfolio or in the underlying funds. You should understand these risks before you invest. If the value of the securities falls, the value of your Units will also fall. We cannot guarantee that your Portfolio will achieve its objective or that your investment return will be positive over any period.

The relative weighting or composition of your Portfolio may change during the life of your Portfolio. Following the Initial Date of Deposit, the Sponsor intends to issue additional Units by depositing in your Portfolio additional securities in a manner consistent with the provisions described in the above section entitled “The Portfolios”. As described in that section, it may not be possible to retain or continue to purchase one or more Securities in your Portfolio. In addition, due to certain limited circumstances described under “Portfolio Administration”, the composition of the Securities in your Portfolio may change. Accordingly, the fluctuations in the relative weighting or composition of your Portfolio may result in concentrations (25% or more of a Portfolio’s assets) in securities of a particular type, industry and/or geographic region described in this section.

Market Risk. Market risk is the risk that the value of the securities in your Portfolio or in the underlying funds will fluctuate. This could cause the value of your Units to fall below your original purchase price. Market value fluctuates in response to various factors. These can include changes in interest rates, inflation, the financial condition of a security’s issuer, perceptions of the issuer, or ratings on a security. Certain geopolitical and other events, including environmental events and public health events such as epidemics and pandemics, may have a global impact and add to instability in world economies and markets generally. Changing economic, political or financial market conditions in one country or geographic

region could adversely affect the market value of the securities held by your Portfolio in a different country or geographic region due to increasingly interconnected global economies and financial markets.

For example, following Russia's invasion of Ukraine in late February 2022, various countries, including the United States, members of NATO and the European Union (“EU”), issued broad-ranging economic sanctions against Russia and Belarus. The resulting responses to the military actions (and potential further sanctions in response to continued military activity), the potential for military escalation and other corresponding events, have had, and could continue to have, severe negative effects on regional and global economic and financial markets, including increased volatility, reduced liquidity and overall uncertainty. The negative impacts may be particularly acute in certain industries including, but not limited to, energy, financials, commodities, engineering, and defense. This could affect the value of your Portfolio's investments, even beyond any direct investment exposure the Portfolios may have to Russian issuers or the adjoining geographic regions. Russia may take additional counter measures or retaliatory actions, which could exacerbate negative consequences on global financial markets. The duration of ongoing hostilities and corresponding sanctions and related events cannot be predicted and may result in a negative impact on performance and the value of Portfolio investments.

Furthermore, a recent outbreak of a respiratory disease caused by a novel coronavirus (“COVID-19”), first detected in China in December 2019, has spread globally in a short period of time. COVID-19 has resulted in the disruption of, and delays in, production and supply chains and the delivery of healthcare services and processes, as well as the cancellation of organized events and educational institutions, a decline in consumer demand for certain goods and services, and general concern and uncertainty. In response, governments and businesses world-wide, including the United States, have taken aggressive measures, including closing borders, restricting international and domestic travel, imposing prolonged quarantines of large populations, and financial support of the economy and financial markets. COVID-19 and its effects have contributed to increased volatility

in global markets, severe losses, liquidity constraints, and lowered yields; the duration of such effects cannot yet be determined but could be present for an extended period of time. The effects that COVID-19 may have on certain sectors and industries are uncertain and may adversely affect the value of your Portfolio.

Even though your Portfolio is supervised, you should remember that we do not manage your Portfolio. Your Portfolio will not sell a security solely because the market value falls as is possible in a managed fund.

Dividend Payment Risk. Dividend payment risk is the risk that an issuer of a security, a fund or an underlying security in a fund is unwilling or unable to pay dividends on a security. Stocks represent ownership interests in the issuers and are not obligations of the issuers. Common stockholders have a right to receive dividends only after the company has provided for payment of its creditors, bondholders and preferred stockholders. Common stocks do not assure dividend payments. Dividends are paid only when declared by an issuer's board of directors and the amount of any dividend may vary over time. If dividends received by your Portfolio are insufficient to cover expenses, redemptions or other Portfolio costs, it may be necessary for your Portfolio to sell Securities to cover such expenses, redemptions or other costs. Any such sales may result in capital gains or losses to you. See "Taxation".

Interest Rate Risk. Interest rate risk is the risk that the value of the fixed income securities held by a closed-end fund will fall if interest rates increase. The securities held by certain closed-end funds typically fall in value when interest rates rise and rise in value when interest rates fall. The securities held by the closed-end funds with longer periods before maturity are often more sensitive to interest rate changes. In a low interest rate environment risks associated with rising rates are heightened. The negative impact on fixed income securities from any interest rate increases could be swift and significant and, as a result, a rise in interest rates may adversely affect the value of your Units.

Credit Risk. Credit risk is the risk that a borrower is unable to meet its obligation to pay principal or interest on a security held by a closed-end fund. This may reduce

the level of dividends a closed-end fund pays which would reduce your income and could cause the value of your Units to fall.

Closed-End Funds. Your Portfolio invests in shares of closed-end funds. You should understand the preceding section titled "Closed-End Funds" before you invest. Shares of closed-end funds frequently trade at a discount from their net asset value in the secondary market. This risk is separate and distinct from the risk that the net asset value of fund shares may decrease. The amount of such discount from net asset value is subject to change from time to time in response to various factors. Closed-end funds are subject to various risks, including management's ability to meet the fund's investment objective, and to manage the fund portfolio when the underlying securities are redeemed or sold, during periods of market turmoil and as investors' perceptions regarding closed-end funds or their underlying investments change. Your Portfolio and the underlying funds have operating expenses. You will bear not only your share of your Portfolio's expenses, but also the expenses of the underlying funds. By investing in other funds, your Portfolio incurs greater expenses than you would incur if you invested directly in the funds.

Corporate Bond Risk. Certain of the closed-end funds held by the Portfolios invest in corporate bonds. Corporate bonds, which are debt instruments issued by corporations to raise capital, have priority over preferred securities and common stock in an issuer's capital structure, but may be subordinated to an issuer's other debt instruments. The market value of a corporate bond may be affected by factors directly related to the issuer, such as investors' perceptions of the creditworthiness of the issuer, the issuer's financial performance, perceptions of the issuer in the market place, performance of the issuer's management, the issuer's capital structure, the use of financial leverage and demand for the issuer's goods and services, and by factors not directly related to the issuer such as general market liquidity. The market value of corporate bonds generally may be expected to rise and fall inversely with interest rates, and as a result, corporate bonds may lose value in a rising-rate environment. To the extent any of the closed-end funds held by your Portfolio are invested in below investment

grade corporate bonds, such bonds are often high risk and have speculative characteristics and may be particularly susceptible to adverse issuer-specific developments (see “High-Yield Security Risk” below).

Senior Loans. The Senior Loan and Limited Duration Portfolio invests significantly in closed-end funds that invest in secured senior loans (or “senior loans”). Senior loans are debt instruments issued by various financial institutions and other issuers to corporations, partnerships, limited liability companies and other entities to finance leveraged buyouts, recapitalizations, mergers, acquisitions, stock repurchases, debt refinancings and, to a lesser extent, for general operating and other purposes. Senior loans are backed by a company's assets and generally hold the most senior position in a company's capital structures of, ahead of other types of debt securities, as well as preferred and common stock. Senior secured loans are typically backed by assets such as inventory, receivables, equipment, real estate property, buildings, intellectual property such as copyrights, patents or trademarks, and even the stock of other companies or subsidiaries. Collateral may also include guarantees or other credit support by affiliates of the borrower. The value of such collateral generally will be determined by reference to financial statements of the borrower, by an independent appraisal, by obtaining the market value of such collateral, in the case of cash or securities if readily ascertainable, or by other customary valuation techniques considered appropriate. The value of collateral may decline and may be difficult to sell in the event of default. In the event that any of the senior loans owned by the Portfolio's underlying closed-end fund defaults, the Portfolio's distribution may be adversely impacted. The loan agreement may or may not require the borrower to pledge additional collateral to secure the senior loan if the value of the initial collateral declines. In the event of non-payment, there is no assurance that such collateral could be readily liquidated, or that liquidation would satisfy the borrower's obligation. In addition, while secured creditors generally receive greater protection in insolvency situations, there is no assurance that collateral could be readily liquidated, or that liquidation of collateral will be sufficient to repay interest and/or principal in such situations. In the event of non-payment concerning a loan

held by a fund in your Portfolio, the value of your Units may be adversely affected. Most borrowers pay their debts from cash flow generated by their businesses. If a borrower's cash flow is insufficient to pay its debts, it may attempt to restructure its debts rather than sell collateral. Borrowers may try to restructure their debts by filing for protection under the federal bankruptcy laws or negotiating a work-out. If a borrower becomes involved in a bankruptcy proceeding, access to collateral may be limited by bankruptcy and other laws. If a court decides that access to collateral is limited or void, the Portfolio's underlying funds facing such a scenario in connection with any of its senior loans may not recover the full amount of principal and interest that is due, which in turn would adversely affect the price of your Units.

Additionally, the underlying loan interest rates “float” above indices, which can move up or down with market rate movements, such as the prime rate offered by one or more major banks, or other alternative benchmark rates or the certificate of deposit rate or other base lending rates used by commercial lenders. As a result, the yield on closed-end funds investing in senior loans will generally decline in a falling interest rate environment and increase in a rising interest rate environment.

Additionally, since senior loans generally have floating interest rates, they are typically not as sensitive as fixed-income investments to price fluctuations due to changes in interest rates. Senior loans have historically paid a higher rate of interest than most short-term investments. Of course, there is no guarantee that this will occur in the future.

As noted above, certain senior loans invested in by funds that the Portfolio owns may reference benchmark rates. Senior loans typically pay interest at least quarterly at rates which equal a fixed percentage spread over a base rate such as the Secured Overnight Financing Rate (“SOFR”) (or, previously the LIBOR). SOFR measures the cost of overnight borrowings through repurchase agreement transactions collateralized with U.S. Treasury securities [For example, if SOFR were 3% and the borrower was paying a fixed spread of 2.50%, the total interest rate paid by the borrower would be 5.50%]. Although a base rate such as SOFR can change every day, loan agreements for senior loans typically allow the

borrower the ability to choose how often the base rate for its loan will change. A single loan may have multiple reset periods at the same time, with each reset period applicable to a designated portion of the loan. Such periods can range from one day to one year, with most borrowers choosing monthly or quarterly reset periods. During periods of rising interest rates, borrowers will tend to choose longer reset periods, and during periods of declining interest rates, borrowers will tend to choose shorter reset periods. The fixed spread over the base rate on a senior loan typically does not change.

Senior loans are generally below investment grade quality and may be unrated at the time of investment; are generally not registered with the Securities and Exchange Commission (“SEC”) or state securities commissions; and are generally not listed on any securities exchange. In addition, the amount of public information available on senior loans is generally less extensive than that typically available for other types of securities.

High-Yield Securities Risk. Certain of the closed-end funds held by your Portfolio may invest in high-yield securities or unrated securities. High-yield, high risk securities are subject to greater market fluctuations and risk of loss than securities with higher investment ratings. The value of these securities will decline significantly with increases in interest rates, not only because increases in rates generally decrease values, but also because increased rates may indicate an economic slowdown. An economic slowdown, or a reduction in an issuer’s creditworthiness, may result in the issuer being unable to maintain earnings at a level sufficient to maintain interest and principal payments.

High-yield or “junk” securities, the generic names for securities rated below “BBB-” by Standard & Poor’s Ratings Services (“Standard & Poor’s”) or “Baa3” by Moody’s Investors Service, Inc. (“Moody’s”), are frequently issued by corporations in the growth stage of their development or by established companies who are highly leveraged or whose operations or industries are depressed. Securities rated below BBB- or Baa3 are considered speculative as these ratings indicate a quality of less than investment grade. Because high-yield securities are generally subordinated obligations and are perceived by investors to be riskier than higher rated

securities, their prices tend to fluctuate more than higher rated securities and are affected by short-term credit developments to a greater degree.

The market for high-yield securities is smaller and less liquid than that for investment grade securities. High-yield securities are generally not listed on a national securities exchange but trade in the over-the-counter markets. Due to the smaller, less liquid market for high-yield securities, the bid-offer spread on such securities is generally greater than it is for investment grade securities and the purchase or sale of such securities may take longer to complete.

Foreign Issuer Risk. Some of the underlying securities held by certain of the closed-end funds in the Portfolios are issued by foreign issuers. This subjects your Portfolio to more risks than if it only invested in closed-end funds which invest solely in securities of domestic issuers. Risks of foreign issuers include restrictions on foreign investments and exchange of securities and inadequate financial information. Foreign securities may also be affected by market and political factors specific to the issuer’s country as well as fluctuations in foreign currency exchange rates. Risks associated with investing in foreign securities may be more pronounced in emerging markets where the securities markets are substantially smaller, less developed, less liquid, less regulated, and more volatile than the securities markets of the U.S. and developed foreign markets. Investments in debt securities of foreign issuers present special risks, including the fact that issuers may be unable or unwilling to repay principal and/or interest when due in accordance with the terms of such debt, or may be unable to make such repayments when due in the currency required under the terms of the debt. Political, economic and social events also may have a greater impact on the price of debt securities issued by foreign issuers than on the price of U.S. securities. In addition, brokerage and other transaction costs on foreign securities exchanges are often higher than in the United States and there is generally less government supervision and regulation of exchanges, brokers and issuers in foreign countries.

In addition, for foreign securities of European issuers, the departure of any EU member from use of the Euro could lead to serious disruptions to foreign exchanges, operations and settlements, which may have an adverse

effect on European issuers. More recently, there is uncertainty regarding the state of the EU following the United Kingdom's ("U.K.") official exit from the EU on January 31, 2020 ("Brexit"). While a trade deal was negotiated and provisionally went into effect on January 1, 2021, Brexit marks the first time that a significant member of the EU will have left. The effect that Brexit may have on the global financial markets is uncertain. No one can predict the impact that these factors could have on the securities held by your Portfolio.

Liquidity Risk. Liquidity risk is the risk that the value of a security will fall if trading in the security is limited or absent. The market for certain investments may become less liquid or illiquid due to adverse changes in the conditions of a particular issuer or due to adverse market or economic conditions. In the absence of a liquid trading market for a particular security, the price at which such security may be sold to meet redemptions, as well as the value of the Units of your Portfolio, may be adversely affected. No one can guarantee that a liquid trading market will exist for any security.

Legislation/Litigation. From time to time, various legislative initiatives are proposed in the United States and abroad which may have a negative impact on certain of the companies represented in your Portfolio or on the tax treatment of your Portfolio or of your investment in the Portfolio. In addition, litigation regarding any of the issuers of the Securities or of the industries represented by these issuers may negatively impact the share prices of these Securities. No one can predict what impact any pending or threatened litigation will have on the share prices of the Securities.

Regulated Investment Company Risk of Underlying Closed-End Funds. The Portfolios intend on investing in closed-end funds that are classified as regulated investment companies ("RICs") under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"). To qualify for the favorable U.S. federal income tax treatment generally accorded to a RIC, a closed-end fund must, among other requirements, derive in each taxable year at least 90% of its gross income from certain prescribed sources and satisfy a diversification test on a quarterly basis. If a closed-end fund fails to satisfy the qualifying income or diversification requirements to be treated as a RIC in any

taxable year, all of its taxable income (including its net capital gain) would be subject to tax at the 21% regular corporate rate without any deduction for distributions to shareholders. Furthermore, such distributions would be taxable as ordinary dividends to the extent of the closed-end fund's current and accumulated earnings and profits, which would effectively reduce (and could eliminate) the fund's returns. In addition, each closed-end fund must timely distribute annually at least 90% of its net investment income (which includes dividends, taxable interest, and the excess of net short-term capital gains over net long-term capital losses, less operating expenses) and at least 90% of its net tax-exempt interest income for each tax year. Retained net capital gain or investment company taxable income by a closed-end fund will generally be subject to tax at the regular corporate rate on the amount retained.

No FDIC Guarantee. An investment in your Portfolio is not a deposit of any bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

PUBLIC OFFERING

General. Units are offered at the Public Offering Price which consists of the net asset value per Unit plus organization costs plus the sales charge. The net asset value per Unit is the value of the securities, cash and other assets in your Portfolio reduced by the liabilities of the Portfolios divided by the total Units outstanding. The maximum sales charge equals 2.75% of the Public Offering Price per Unit (2.828% of the aggregate offering price of the Securities) at the time of purchase.

The initial sales charge is the difference between the total sales charge amount (maximum of 2.75% of the Public Offering Price per Unit) and the sum of the remaining fixed dollar deferred sales charge and the fixed dollar creation and development fee (initially \$0.275 per Unit). Depending on the Public Offering Price per Unit, you pay the initial sales charge at the time you buy Units. The deferred sales charge is fixed at \$0.225 per Unit. Your Portfolio pays the deferred sales charge in installments as described in the "Fee Table." If any deferred sales charge payment date is not a business day, we will charge the payment on the next business day. If you purchase Units

after the initial deferred sales charge payment, you will only pay that portion of the payments not yet collected. If you redeem or sell your Units prior to collection of the total deferred sales charge, you will pay any remaining deferred sales charge upon redemption or sale of your Units. The initial and deferred sales charges are referred to as the “transactional sales charge.” The transactional sales charge does not include the creation and development fee which compensates the Sponsor for creating and developing your Portfolio and is described under “Expenses.” The creation and development fee is fixed at \$0.05 per Unit. Your Portfolio pays the creation and development fee as of the close of the initial offering period as described in the “Fee Table.” If you redeem or sell your Units prior to collection of the creation and development fee, you will not pay the creation and development fee upon redemption or sale of your Units. After the initial offering period the maximum sales charge will be reduced by 0.50%, reflecting the previous collection of the creation and development fee. Because the deferred sales charge and creation and development fee are fixed dollar amounts per Unit, the actual charges will exceed the percentages shown in the “Fee Table” if the Public Offering Price per Unit falls below \$10 and will be less than the percentages shown in the “Fee Table” if the Public Offering Price per Unit exceeds \$10. In no event will the maximum total sales charge exceed 2.75% of the Public Offering Price per Unit.

The “Fee Table” shows the sales charge calculation at a \$10 Public Offering Price per Unit. At a \$10 Public Offering Price, there is no initial sales charge during the initial offering period. If the Public Offering Price exceeds \$10 per Unit, you will pay an initial sales charge equal to the difference between the total sales charge and the sum of the remaining deferred sales charge and the creation and development fee. For example, if the Public Offering Price per Unit rose to \$14, the maximum sales charge would be \$0.385 (2.75% of the Public Offering Price per Unit), consisting of an initial sales charge of \$0.110, a deferred sales charge of \$0.225 and the creation and development fee of \$0.050. Since the deferred sales charge and creation and development fee are fixed dollar amounts per Unit, your Portfolio must charge these amounts per Unit regardless of any decrease in net asset

value. However, if the Public Offering Price per Unit falls to the extent that the maximum sales charge percentage results in a dollar amount that is less than the combined fixed dollar amounts of the deferred sales charge and creation and development fee, your initial sales charge will be a credit equal to the amount by which these fixed dollar charges exceed your sales charge at the time you buy Units. In such a situation, the value of securities per Unit would exceed the Public Offering Price per Unit by the amount of the initial sales charge credit and the value of those securities will fluctuate, which could result in a benefit or detriment to Unitholders that purchase Units at that price. The initial sales charge credit is paid by the Sponsor and is not paid by your Portfolio. If the Public Offering Price per Unit fell to \$6, the maximum sales charge would be \$0.165 (2.75% of the Public Offering Price per Unit), which consists of an initial sales charge (credit) of -\$0.110, a deferred sales charge of \$0.225 and a creation and development fee of \$0.050.

The actual sales charge that may be paid by an investor may differ slightly from the sales charges shown herein due to rounding that occurs in the calculation of the Public Offering Price and in the number of Units purchased.

The minimum purchase is 100 Units (25 Units for retirement accounts) but may vary by selling firm. Certain broker-dealers or selling firms may charge an order handling fee for processing Unit purchases.

Reducing Your Sales Charge. The Sponsor offers ways for you to reduce the sales charge that you pay. It is your financial professional’s responsibility to alert the Sponsor of any discount when you purchase Units. Before you purchase Units you must also inform your financial professional of your qualification for any discount to be eligible for a reduced sales charge. Since the deferred sales charges and creation and development fee are fixed dollar amounts per Unit, your Portfolio must charge these amounts per Unit regardless of any discounts. However, if you are eligible to receive a discount such that your total sales charge is less than the fixed dollar amounts of the deferred sales charges and creation and development fee, you will receive a credit equal to the difference between your total sales charge and these fixed dollar charges at the time you buy Units.

Fee Accounts. Investors may purchase Units through registered investment advisers, certified financial planners and registered broker-dealers who in each case either charge periodic fees for brokerage services, financial planning, investment advisory or asset management services, or provide such services in connection with the establishment of an investment account for which a comprehensive “fee based” charge (“Fee Based”) is imposed (“Fee Accounts”). If Units of the Portfolios are purchased for a Fee Account and the Portfolios are subject to a Fee Based charge (i.e., the Portfolios are “Fee Based Eligible”), then the purchase will not be subject to the transactional sales charge but will be subject to the creation and development fee of \$0.05 per Unit that is retained by the Sponsor. Please refer to the section called “Fee Accounts” for additional information on these purchases. The Sponsor reserves the right to limit or deny purchases of Units described in this paragraph by investors or selling firms whose frequent trading activity is determined to be detrimental to the Portfolios. Fee Based Eligible Units are not eligible for any sales charge discounts in addition to that which is described in this paragraph and under the “Fee Accounts” section found below.

Certain Self-Directed Brokerage Platforms. Purchases of Units through E*TRADE and/or any other Morgan Stanley self-directed brokerage platform will be executed at the Public Offering Price less the applicable dealer concession.

Employees. Employees, officers and directors (including their spouses (or the equivalent if recognized under local law) and children or step-children under 21 living in the same household, parents or step-parents and trustees, custodians or fiduciaries for the benefit of such persons) of Invesco Capital Markets, Inc. and its affiliates, and dealers and their affiliates may purchase Units at the Public Offering Price less the applicable dealer concession. All employee discounts are subject to the policies of the related selling firm, including any eligibility limitations enforced by the selling firm. Only employees, officers and directors of companies that allow their employees to participate in this employee discount program are eligible for the discounts.

Distribution Reinvestments. We do not charge any sales charge when you reinvest distributions from your

Portfolio into additional Units of your Portfolio. Since the deferred sales charge and creation and development fee are fixed dollar amounts per unit, your Portfolio must charge these amounts per unit regardless of this discount. If you elect to reinvest distributions, the Sponsor will credit you with additional Units with a dollar value sufficient to cover the amount of any remaining deferred sales charge and creation and development fee that will be collected on such Units at the time of reinvestment. The dollar value of these Units will fluctuate over time.

Unit Price. The Public Offering Price of Units will vary from the amounts stated under “Essential Information” in accordance with fluctuations in the prices of the underlying Securities in your Portfolio. The initial price of the Securities upon deposit by the Sponsor was determined by the Trustee. The Trustee will generally determine the value of the Securities as of the Evaluation Time on each business day and will adjust the Public Offering Price of Units accordingly. The Evaluation Time is the close of the New York Stock Exchange on each business day. The term “business day”, as used herein and under “Rights of Unitholders--Redemption of Units”, means any day on which the New York Stock Exchange is open for regular trading. The Public Offering Price per Unit will be effective for all orders received prior to the Evaluation Time on each business day. Orders received by the Sponsor prior to the Evaluation Time and orders received by authorized financial professionals prior to the Evaluation Time that are properly transmitted to the Sponsor by the time designated by the Sponsor, are priced based on the date of receipt. Orders received by the Sponsor after the Evaluation Time, and orders received by authorized financial professionals after the Evaluation Time or orders received by such persons that are not transmitted to the Sponsor until after the time designated by the Sponsor, are priced based on the date of the next determined Public Offering Price per Unit provided they are received timely by the Sponsor on such date. It is the responsibility of authorized financial professionals to transmit orders received by them to the Sponsor so they will be received in a timely manner.

The value of portfolio securities is based on the securities’ market price when available. When a market price is not readily available, including circumstances

under which the Trustee determines that a security's market price is not accurate, a portfolio security is valued at its fair value, as determined under procedures established by the Trustee or an independent pricing service used by the Trustee. In these cases, the Portfolios' net asset value will reflect certain portfolio securities' fair value rather than their market price. With respect to securities that are primarily listed on foreign exchanges, the value of the portfolio securities may change on days when you will not be able to purchase or sell Units. The value of any foreign securities is based on the applicable currency exchange rate as of the Evaluation Time. The Sponsor will provide price dissemination and oversight services to your Portfolio.

During the initial offering period, part of the Public Offering Price represents an amount that will pay the costs incurred in establishing your Portfolio. These costs include the costs of preparing documents relating to your Portfolio (such as the registration statement, prospectus, trust agreement and legal documents), federal and state registration fees, the initial fees and expenses of the Trustee and the initial audit. Your Portfolio will sell securities to reimburse us for these costs at the end of the initial offering period or after six months, if earlier. The value of your Units will decline when your Portfolio pays these costs.

Unit Distribution. Units will be distributed to the public by the Sponsor, broker-dealers and others at the Public Offering Price. Units repurchased in the secondary market, if any, may be offered by this prospectus at the secondary market Public Offering Price in the manner described above.

Unit Sales Concessions. Brokers, dealers and others will be allowed a regular concession or agency commission in connection with the distribution of Units during the initial offering period of 2.00% of the Public Offering Price per Unit.

Volume Concession Based Upon Annual Sales. As described below, broker-dealers and other selling agents may in certain cases be eligible for an additional concession based upon their annual eligible sales of all Invesco fixed income and equity unit investment trusts. Eligible sales include all units of any Invesco unit

investment trust underwritten or purchased directly from Invesco during a trust's initial offering period. For purposes of this concession, trusts designated as either "Invesco Unit Trusts, Taxable Income Series" or "Invesco Unit Trusts, Municipal Series" are fixed income trusts, and trusts designated as "Invesco Unit Trusts Series" are equity trusts. In addition to the regular concessions or agency commissions described above in "Unit Sales Concessions" all broker-dealers and other selling firms will be eligible to receive additional compensation based on total initial offering period sales of all eligible Invesco unit investment trusts during the previous consecutive 12-month period through the end of the most recent month. The Volume Concession, as applicable to equity and fixed income trust units, is set forth in the following table:

Total Sales (in millions)	Volume Concession	
	Equity Trust Units	Fixed Income Trust Units
\$25 but less than \$100	0.035%	0.100%
\$100 but less than \$150	0.050	0.100
\$150 but less than \$250	0.075	0.100
\$250 but less than \$1,000	0.100	0.100
\$1,000 but less than \$5,000	0.125	0.100
\$5,000 but less than \$7,500	0.150	0.100
\$7,500 or more	0.175	0.100

Broker-dealers and other selling firms will not receive the Volume Concession on the sale of units purchased in Fee Accounts, however, such sales will be included in determining whether a firm has met the sales level breakpoints set forth in the Volume Concession table above. Secondary market sales of all unit investment trusts are excluded for purposes of the Volume Concession. Eligible dealer firms and other selling agents include clearing firms that place orders with Invesco and provide Invesco with information with respect to the representatives who initiated such transactions. Eligible dealer firms and other selling agents will not include firms that solely provide clearing services to other broker-dealer firms or firms who place orders through clearing firms that are eligible dealers. We reserve the right to change the amount of the concessions or agency commissions from time to time. For a trust to be eligible for this additional compensation, the trust's prospectus must include disclosure related to this additional compensation.

Additional Information. Except as provided in this section, any sales charge discount provided to investors will be borne by the selling broker-dealer or agent. For all secondary market transactions the total concession or agency commission will amount to 80% of the applicable sales charge. Notwithstanding anything to the contrary herein, in no case shall the total of any concessions, agency commissions and any additional compensation allowed or paid to any broker, dealer or other distributor of Units with respect to any individual transaction exceed the total sales charge applicable to such transaction. The Sponsor reserves the right to reject, in whole or in part, any order for the purchase of Units and to change the amount of the concession or agency commission to dealers and others from time to time.

We may provide, at our own expense and out of our own profits, additional compensation and benefits to broker-dealers who sell Units of the Portfolios and our other products. This compensation is intended to result in additional sales of our products and/or compensate broker-dealers and financial advisors for past sales. We may make these payments for marketing, promotional or related expenses, including, but not limited to, expenses of entertaining retail customers and financial advisors, advertising, sponsorship of events or seminars, obtaining shelf space in broker-dealer firms and similar activities designed to promote the sale of the Portfolios and our other products. Fees may include payment for travel expenses, including lodging, incurred in connection with trips taken by invited registered representatives for meetings or seminars of a business nature. These arrangements will not change the price you pay for your Units.

Sponsor Compensation. The Sponsor will receive the total sales charge applicable to each transaction. Except as provided under “Unit Distribution” above, any sales charge discount provided to investors will be borne by the selling dealer or agent. In addition, the Sponsor will realize a profit or loss as a result of the difference between the price paid for the Securities by the Sponsor and the cost of the Securities to your Portfolio on the Initial Date of Deposit as well as on subsequent deposits. The Sponsor has not participated as sole underwriter or as manager or as a member of the underwriting syndicates

or as an agent in a private placement for any of the Securities. The Sponsor may realize profit or loss as a result of fluctuations in the market value of Units held by the Sponsor for sale to the public. In maintaining a secondary market, the Sponsor will realize profits or losses in the amount of any difference between the price at which Units are purchased and the price at which Units are resold (which price includes the applicable sales charge) or from a redemption of repurchased Units at a price above or below the purchase price. Cash, if any, made available to the Sponsor prior to the date of settlement for the purchase of Units may be used in the Sponsor’s business and may be deemed to be a benefit to the Sponsor, subject to the limitations of the Securities Exchange Act of 1934, as amended (“1934 Act”).

The Sponsor or an affiliate may have participated in a public offering of one or more of the Securities. The Sponsor, an affiliate or their employees may have a long or short position in these Securities or related securities. An affiliate may act as a specialist or market maker for these Securities. An officer, director or employee of the Sponsor or an affiliate may be an officer or director for issuers of the Securities.

Market for Units. Although it is not obligated to do so, the Sponsor may maintain a market for Units and to purchase Units at the secondary market repurchase price (which is described under “Right of Unitholders--Redemption of Units”). The Sponsor may discontinue purchases of Units or discontinue purchases at this price at any time. In the event that a secondary market is not maintained, a Unitholder will be able to dispose of Units by tendering them to the Trustee for redemption at the Redemption Price. See “Rights of Unitholders--Redemption of Units”. Unitholders should contact their broker to determine the best price for Units in the secondary market. Units sold prior to the time the entire deferred sales charge has been collected will be assessed the amount of any remaining deferred sales charge at the time of sale. The Trustee will notify the Sponsor of any Units tendered for redemption. If the Sponsor’s bid in the secondary market equals or exceeds the Redemption Price per Unit, it may purchase the Units not later than the day on which Units would have been redeemed by

the Trustee. The Sponsor may sell repurchased Units at the secondary market Public Offering Price per Unit.

RETIREMENT ACCOUNTS

Units are available for purchase in connection with certain types of tax-sheltered retirement plans, including Individual Retirement Accounts for individuals, Simplified Employee Pension Plans for employees, qualified plans for self-employed individuals, and qualified corporate pension and profit sharing plans for employees. The minimum purchase for these accounts is reduced to 25 Units but may vary by selling firm. The purchase of Units may be limited by the plans' provisions and does not itself establish such plans.

FEE ACCOUNTS

As described above, Units may be available for purchase by investors in Fee Accounts where the Portfolios are Fee Based Eligible. You should consult your financial professional to determine whether you can benefit from these accounts. The table illustrates the sales charge you will pay if the Portfolios are Fee Based Eligible as a percentage of the initial Public Offering Price per Unit on the Initial Date of Deposit (the percentage will vary thereafter).

Initial sales charge	0.00%
Deferred sales charge	<u>0.00</u>
Transactional sales charge	<u>0.00%</u>
Creation and development fee	<u>0.50%</u>
Total sales charge	<u>0.50%</u>

You should consult the "Public Offering--Reducing Your Sales Charge" section for specific information on this and other sales charge discounts. That section governs the calculation of all sales charge discounts. The Sponsor reserves the right to limit or deny purchases of Units in Fee Accounts by investors or selling firms whose frequent trading activity is determined to be detrimental to the Portfolios are. To purchase Units in these Fee Accounts, your financial professional must purchase Units designated with one of the Fee Based CUSIP numbers set forth under

"Essential Information," either Fee Based Cash for cash distributions or Fee Based Reinvest for the reinvestment of distributions in additional Units, if available. See "Rights of Unitholders--Reinvestment Option."

RIGHTS OF UNITHOLDERS

Distributions. Dividends and interest, net of expenses, and any net proceeds from the sale of Securities received by your Portfolio will generally be distributed to Unitholders on each Distribution Date to Unitholders of record on the preceding Record Date. These dates appear under "Essential Information". Distributions made by the closed-end funds in your Portfolio include ordinary income, but may also include sources other than ordinary income such as returns of capital, loan proceeds, short-term capital gains and long-term capital gains (see "Taxation--Distributions"). In addition, your Portfolio will generally make required distributions at the end of each year because it is structured as a "regulated investment company" for federal tax purposes. Unitholders will also receive a final distribution of income when their Portfolio terminates. A person becomes a Unitholder of record on the date of settlement (generally two business days after Units are ordered, or any shorter period as may be required by the applicable rules under the 1934 Act). Unitholders may elect to receive distributions in cash or to have distributions reinvested into additional Units. See "Rights of Unitholders--Reinvestment Option".

Dividends and interest received by your Portfolio are credited to the Income Account of the Portfolio. Other receipts (e.g., capital gains, proceeds from the sale of Securities, etc.) are credited to the Capital Account. Proceeds received on the sale of any Securities, to the extent not used to meet redemptions of Units or pay deferred sales charges, fees or expenses, will be distributed to Unitholders. Proceeds received from the disposition of any Securities after a Record Date and prior to the following Distribution Date will be held in the Capital Account and not distributed until the next Distribution Date. Any distribution to Unitholders consists of each Unitholder's pro rata share of the available cash in the Income and Capital Accounts as of the related Record Date.

PORTFOLIOS Estimated Distributions. The Historical 12 Month Distributions per Unit, and Estimated Initial Distribution per Unit (if any), may be shown under "Essential Information." These figures are based upon the weighted average of the actual distributions paid by the securities included in your Portfolio over the 12 months preceding the Initial Date of Deposit and are reduced to account for the effects of fees and expenses which will be incurred when investing in your Portfolio. While both figures are calculated using a Public Offering Price of \$10 per Unit, any presented Estimated Initial Distribution per Unit will reflect an estimate of the per Unit distributions you may receive on the first Distribution Date based upon each issuer's preceding 12 month distributions. Dividend payments are not assured and therefore the amount of future dividend income to your Portfolio is uncertain. The actual net annual distributions may decrease over time because a portion of the securities included in your Portfolio will be sold to pay for the organization costs, deferred sales charge and creation and development fee. Securities may also be sold to pay regular fees and expenses during your Portfolio's life. The actual net annual income distributions you receive will vary from the Historical 12 Month Distributions amount due to changes in dividends and distribution amounts paid by issuers, currency fluctuations, the sale of securities to pay any deferred sales charge, Portfolio fees and expenses, and with changes in your Portfolio such as the acquisition, call, maturity or sale of securities. In addition, due to the negative economic impact across many industries caused by the recent COVID-19 outbreak, certain issuers of the securities included in the Portfolios may elect to reduce the amount of, or cancel entirely, dividends and/or distributions paid in the future. As a result, the Historical 12 Month Distributions per Unit, and Estimated Initial Distribution per Unit (if any), shown under "Essential Information" will likely be higher, and in some cases significantly higher, than the actual distributions achieved by the Portfolios. Due to these and various other factors, actual income received by your Portfolio will most likely differ from the most recent dividends or scheduled income payments.

Reinvestment Option. Unitholders may have distributions automatically reinvested in additional Units

without a sales charge (to the extent Units may be lawfully offered for sale in the state in which the Unitholder resides). The CUSIP numbers for either "Cash" distributions or "Reinvest" for the reinvestment of distributions are set forth under "Essential Information". Brokers and dealers can use the Dividend Reinvestment Service through Depository Trust Company ("DTC") or purchase a Reinvest (or Fee Based Reinvest in the case of Fee Based Eligible Units held in Fee Accounts) CUSIP, if available. To participate in this reinvestment option, a Unitholder must file with the Trustee a written notice of election, together with any other documentation that the Trustee may then require, at least five days prior to the related Record Date. A Unitholder's election will apply to all Units owned by the Unitholder and will remain in effect until changed by the Unitholder. The reinvestment option is not offered during the 30 calendar days prior to termination. If Units are unavailable for reinvestment or this reinvestment option is no longer available, distributions will be paid in cash. Distributions will be taxable to Unitholders if paid in cash or automatically reinvested in additional Units. See "Taxation."

A participant may elect to terminate his or her reinvestment plan and receive future distributions in cash by notifying the Trustee in writing no later than five days before a Distribution Date. The Sponsor shall have the right to suspend or terminate the reinvestment plan at any time. The reinvestment plan is subject to availability or limitation by each broker-dealer or selling firm. Broker-dealers may suspend or terminate the offering of a reinvestment plan at any time. Please contact your financial professional for additional information.

Redemption of Units. All or a portion of your Units may be tendered to The Bank of New York Mellon, the Trustee, for redemption at Unit Investment Trust Division, 111 Sanders Creek Parkway, East Syracuse, New York 13057, on any day the New York Stock Exchange is open. No redemption fee will be charged by the Sponsor or the Trustee, but you are responsible for applicable governmental charges, if any. Units redeemed by the Trustee will be canceled. You may redeem all or a portion of your Units by sending a request for redemption to your bank or broker-dealer through which you hold your Units. No later than two business days (or any shorter period as

may be required by the applicable rules under the 1934 Act) following satisfactory tender, the Unitholder will be entitled to receive in cash an amount for each Unit equal to the Redemption Price per Unit next computed on the date of tender. The “date of tender” is deemed to be the date on which Units are received by the Trustee, except that with respect to Units received by the Trustee after the Evaluation Time or on a day which is not a business day, the date of tender is deemed to be the next business day. Redemption requests received by the Trustee after the Evaluation Time, and redemption requests received by authorized financial professionals after the Evaluation Time or redemption requests received by such persons that are not transmitted to the Trustee until after the time designated by the Trustee, are priced based on the date of the next determined redemption price provided they are received timely by the Trustee on such date. It is the responsibility of authorized financial professionals to transmit redemption requests received by them to the Trustee so they will be received in a timely manner. Certain broker-dealers or selling firms may charge an order handling fee for processing redemption requests. Units redeemed directly through the Trustee are not subject to such fees.

Unitholders tendering 1,000 or more Units (or such higher amount as may be required by your broker-dealer or selling agent) for redemption may request an in kind distribution of Securities equal to the Redemption Price per Unit on the date of tender. Unitholders may not request an in kind distribution during the initial offering period or within 30 calendar days of the Portfolios’ termination. The Portfolios generally will not offer in kind distributions of portfolio securities that are held in foreign markets. An in kind distribution will be made by the Trustee through the distribution of each of the Securities in book-entry form to the account of the Unitholder’s broker-dealer at DTC. Amounts representing fractional shares will be distributed in cash. The Trustee may adjust the number of shares of any Security included in a Unitholder’s in kind distribution to facilitate the distribution of whole shares. The in kind distribution option may be modified or discontinued at any time without notice. Notwithstanding the foregoing, if the Unitholder requesting an in kind distribution is the Sponsor or an

affiliated person of the Portfolios, the Trustee may make an in kind distribution to such Unitholder provided that no one with a pecuniary incentive to influence the in kind distribution may influence selection of the distributed securities, the distribution must consist of a pro rata distribution of all portfolio securities (with limited exceptions) and the in kind distribution may not favor such affiliated person to the detriment of any other Unitholder. Unitholders will incur transaction costs in liquidating securities received in an in-kind distribution, and any such securities received will be subject to market risk until sold. In the event that any securities received in-kind are illiquid, Unitholders will bear the risk of not being able to sell such securities in the near term, or at all.

The Trustee may sell Securities to satisfy Unit redemptions. To the extent that Securities are redeemed in kind or sold, the size of the Portfolios will be, and the diversity of the Portfolios may be, reduced. Sales may be required at a time when Securities would not otherwise be sold and may result in lower prices than might otherwise be realized. The price received upon redemption may be more or less than the amount paid by the Unitholder depending on the value of the Securities at the time of redemption. Special federal income tax consequences will result if a Unitholder requests an in kind distribution. See “Taxation”.

The Redemption Price per Unit and the secondary market repurchase price per Unit are equal to the pro rata share of each Unit in the Portfolios determined on the basis of (i) the cash on hand in the Portfolios, (ii) the value of the Securities in the Portfolios and (iii) dividends or other income distributions receivable on the Securities in the Portfolios trading ex-dividend as of the date of computation, less (a) amounts representing taxes or other governmental charges payable out of the Portfolios, (b) the accrued expenses of the Portfolios (including costs associated with liquidating securities after the end of the initial offering period) and (c) any unpaid deferred sales charge payments. During the initial offering period, the redemption price and the secondary market repurchase price will not be reduced by estimated organization costs or the creation and development fee. For these purposes, the Trustee will determine the value of the Securities as described under “Public Offering--Unit Price.”

The right of redemption may be suspended and payment postponed for any period during which the New York Stock Exchange is closed, other than for customary weekend and holiday closings, or any period during which the Securities and Exchange Commission (“SEC”) determines that trading on that Exchange is restricted or an emergency exists, as a result of which disposal or evaluation of the Securities is not reasonably practicable, or for other periods as the SEC may permit.

Exchange Option. When you redeem Units of your Portfolio or when your Portfolio terminates (see “Rollover” below), you may be able to exchange your Units for units of other Invesco unit trusts. You should contact your financial professional for more information about trusts currently available for exchanges. Before you exchange Units, you should read the prospectus of the new trust carefully and understand the risks and fees. You should then discuss this option with your financial professional to determine whether your investment goals have changed, whether current trusts suit you and to discuss tax consequences. A rollover or exchange is a taxable event to you. We may discontinue this option at any time.

Rollover. We may offer a subsequent series of your Portfolio for a Rollover when the Portfolios terminate.

On the Mandatory Termination Date you will have the option to (1) participate in a Rollover and have your Units reinvested into a subsequent trust series or (2) receive a cash distribution.

If you elect to participate in a cash Rollover, your Units will be redeemed on the Mandatory Termination Date. As the redemption proceeds become available, the proceeds (including dividends) will be invested in a new trust series at the public offering price for the new trust. The Trustee will attempt to sell Securities to satisfy the redemption as quickly as practicable on the Mandatory Termination Date. We do not anticipate that the sale period will be longer than one day, however, certain factors could affect the ability to sell the Securities and could impact the length of the sale period. The liquidity of any Security depends on the daily trading volume of the Security and the amount available for redemption and reinvestment on any day.

We may make subsequent trust series available for sale at various times during the year. Of course, we cannot guarantee that a subsequent trust or sufficient units will be available or that any subsequent trusts will offer the same investment strategy or objective as your current Portfolio. We cannot guarantee that a Rollover will avoid any negative market price consequences resulting from trading large volumes of securities. Market price trends may make it advantageous to sell or buy securities more quickly or more slowly than permitted by Portfolio procedures. We may, in our sole discretion, modify a Rollover or stop creating units of a trust at any time regardless of whether all proceeds of Unitholders have been reinvested in a Rollover. If we decide not to offer a subsequent series, Unitholders will be notified prior to the Mandatory Termination Date. Cash which has not been reinvested in a Rollover will be distributed to Unitholders shortly after the Mandatory Termination Date. Rollover participants may receive taxable dividends or realize taxable capital gains which are reinvested in connection with a Rollover but may not be entitled to a deduction for capital losses due to the “wash sale” tax rules. Due to the reinvestment in a subsequent trust, no cash will be distributed to pay any taxes. See “Taxation”.

Units. Ownership of Units is evidenced in book-entry form only and will not be evidenced by certificates. Units purchased or held through your bank or broker-dealer will be recorded in book-entry form and credited to the account of your bank or broker-dealer at DTC. Units are transferable by contacting your bank or broker-dealer through which you hold your Units. Transfer, and the requirements therefore, will be governed by the applicable procedures of DTC and your agreement with the DTC participant in whose name your Units are registered on the transfer records of DTC.

Reports Provided. Unitholders will receive a statement of dividends and other amounts received by the Portfolios for each distribution.

In addition, at the end of each calendar year, the Trustee will prepare a statement which contains the following information:

- A summary of transactions in your Portfolio for the year;

- A list of any Securities sold during the year and the Securities held at the end of that year by your Portfolio;
- The Redemption Price per Unit and the number of Units outstanding, computed on the 31st day of December of such year (or the last business day before); and
- Amounts of income and capital distributed during the year.

Beginning calendar year-end 2022, the annual statements will be made available at www.invesco.com/us/financial-products/unit-trusts within a reasonable period of time after the end of each calendar year. You may also request an annual statement be sent to you by calling the Trustee at 800-856-8487. Unitholders may obtain evaluations of the Securities upon request to the Trustee.

If you have questions regarding your account or your Portfolio, please contact your financial advisor or the Trustee. The Sponsor does not have access to individual account information.

PORTFOLIO ADMINISTRATION

Portfolio Administration. The Portfolios are not a managed fund and, except as provided in the Trust Agreement, Securities generally will not be sold or replaced. The Sponsor may, however, direct that Securities be sold in certain limited circumstances to protect the Portfolios based on advice from the Supervisor. These situations may include events such as the issuer having defaulted on payment of any of its outstanding obligations or the price of a Security has declined to such an extent or other credit factors exist so that in the opinion of the Supervisor retention of the Security would be detrimental to the Portfolios. If a public tender offer has been made for a Security or a merger or acquisition has been announced affecting a Security, the Trustee may either sell the Security or accept an offer if the Supervisor determines that the sale or exchange is in the best interest of Unitholders. The Trustee will distribute any cash proceeds to Unitholders. In addition, the Trustee may sell Securities to redeem Units or pay Portfolio expenses or deferred sales charges. If securities or

property are acquired by the Portfolios, the Sponsor may direct the Trustee to sell the securities or property and distribute the proceeds to Unitholders or to accept the securities or property for deposit in the Portfolios. Should any contract for the purchase of any of the Securities fail, the Sponsor will (unless substantially all of the moneys held in the Portfolios to cover the purchase are reinvested in substitute Securities in accordance with the Trust Agreement) refund the cash and sales charge attributable to the failed contract to all Unitholders on or before the next Distribution Date.

The Sponsor may direct the reinvestment of proceeds of the sale of Securities if the sale is the direct result of serious adverse credit factors which, in the opinion of the Sponsor, would make retention of the Securities detrimental to the Portfolios. In such a case, the Sponsor may, but is not obligated to, direct the reinvestment of sale proceeds in any other securities that meet the criteria for inclusion in the Portfolios on the Initial Date of Deposit. The Sponsor may also instruct the Trustee to take action necessary to ensure that the Portfolios continue to satisfy the qualifications of a regulated investment company and to avoid imposition of tax on undistributed income of the Portfolios.

In general, the Trust Agreement requires the Trustee to vote all shares of the closed-end funds held in your Portfolio in the same manner and ratio on all proposals as the owners of such shares not held by the Portfolios. The Sponsor will instruct the Trustee how to vote the securities and preferred securities held in your Portfolio, if any. The Trustee will vote the securities and preferred securities in the same general proportion as shares held by other shareholders if the Sponsor fails to provide instructions.

When your Portfolio sells Securities, the composition and diversity of the Securities in the Portfolios may be altered. However, if the Trustee sells Securities to redeem Units or to pay Portfolio expenses or sales charges, the Trustee will do so, as nearly as practicable, on a pro rata basis. In order to obtain the best price for your Portfolio, it may be necessary for the Supervisor to specify minimum amounts in which blocks of Securities are to be sold. In effecting purchases and sales of portfolio securities, the Sponsor may direct that orders be placed

with and brokerage commissions be paid to brokers, including brokers which may be affiliated with the Portfolios, the Sponsor or dealers participating in the offering of Units.

Pursuant to an exemptive order, your Portfolio may be permitted to sell Securities to a new trust when it terminates if those Securities are included in the new trust. The exemption may enable the Portfolios to eliminate commission costs on these transactions. The price for those securities will be the closing sale price on the sale date on the exchange where the Securities are principally traded, as certified by the Sponsor.

Amendment of the Trust Agreement. The Trustee and the Sponsor may amend the Trust Agreement without the consent of Unitholders to correct any provision which may be defective or to make other provisions that will not materially adversely affect Unitholders (as determined in good faith by the Sponsor and the Trustee). The Trust Agreement may not be amended to increase the number of Units or permit acquisition of securities in addition to or substitution for the Securities (except as provided in the Trust Agreement). The Trustee will notify Unitholders of any amendment.

Termination. The Portfolios will terminate on the Mandatory Termination Date specified under “Essential Information” or upon the sale or other disposition of the last Security held in a Portfolio. Your Portfolio may be terminated at any time with consent of Unitholders representing two-thirds of the outstanding Units or by the Trustee when the value of the Portfolios is less than \$500,000 (\$3,000,000 if the value of the Portfolios has exceeded \$15,000,000) (the “Minimum Termination Value”). Your Portfolio will be liquidated by the Trustee in the event that a sufficient number of Units of the Portfolios not yet sold are tendered for redemption by the Sponsor, so that the net worth of the Portfolios would be reduced to less than 40% of the value of the Securities at the time they were deposited in the Portfolios. If your Portfolio is liquidated because of the redemption of unsold Units by the Sponsor, the Sponsor will refund to each purchaser of Units the entire sales charge paid by such purchaser. The Trustee may begin to sell Securities in connection with the Portfolios termination nine business days before,

and no later than, the Mandatory Termination Date. Qualified Unitholders may elect an in kind distribution of Securities, provided that Unitholders may not request an in kind distribution of Securities within 30 calendar days of the Portfolios’ termination. Any in kind distribution of Securities will be made in the manner and subject to the restrictions described under “Rights of Unitholders--Redemption of Units”, provided that, in connection with an in kind distribution election more than 30 calendar days prior to termination, Unitholders tendering 1,000 or more Units of the Portfolios (or such higher amount as may be required by your broker-dealer or selling agent) may request an in kind distribution of Securities equal to the Redemption Price per Unit on the date of tender. Unitholders will receive a final cash distribution within a reasonable time after the Mandatory Termination Date. All distributions will be net of Portfolio expenses and costs. Unitholders will receive a final distribution statement following termination. The Information Supplement contains further information regarding termination of your Portfolio. See “Additional Information”.

Limitations on Liabilities. The Sponsor, Supervisor and Trustee are under no liability for taking any action or for refraining from taking any action in good faith pursuant to the Trust Agreement, or for errors in judgment, but shall be liable only for their own willful misfeasance, bad faith or gross negligence (negligence in the case of the Trustee) in the performance of their duties or by reason of their reckless disregard of their obligations and duties hereunder. The Trustee is not liable for depreciation or loss incurred by reason of the sale by the Trustee of any of the Securities. In the event of the failure of the Sponsor to act under the Trust Agreement, the Trustee may act thereunder and is not liable for any action taken by it in good faith under the Trust Agreement. The Trustee is not liable for any taxes or other governmental charges imposed on the Securities, on it as Trustee under the Trust Agreement or on the Portfolios which the Trustee may be required to pay under any present or future law of the United States of America or of any other taxing authority having jurisdiction. In addition, the Trust Agreement contains other customary provisions limiting the liability of the Trustee. The Sponsor and Supervisor may rely on any evaluation furnished by the Trustee and have no

responsibility for the accuracy thereof. Determinations by the Trustee shall be made in good faith upon the basis of the best information available to it.

Sponsor. Invesco Capital Markets, Inc. is the Sponsor of your Portfolio. The Sponsor is a wholly owned subsidiary of Invesco Advisers, Inc. ("Invesco Advisers"). Invesco Advisers is an indirect wholly owned subsidiary of Invesco Ltd., a leading independent global investment manager that provides a wide range of investment strategies and vehicles to its retail, institutional and high net worth clients around the globe. The Sponsor's principal office is located at 11 Greenway Plaza, Houston, Texas 77046-1173. As of December 31, 2023, the total stockholders' equity of Invesco Capital Markets, Inc. was \$54,952,802.95 (unaudited). The current assets under management and supervision by Invesco Ltd. and its affiliates were valued at approximately \$1,585.3 billion as of December 31, 2023.

The Sponsor and your Portfolio have adopted a code of ethics requiring Invesco Ltd.'s employees who have access to information on Portfolio transactions to report personal securities transactions. The purpose of the code is to avoid potential conflicts of interest and to prevent fraud, deception or misconduct with respect to your Portfolio. The Information Supplement contains additional information about the Sponsor.

If the Sponsor shall fail to perform any of its duties under the Trust Agreement or become incapable of acting or shall become bankrupt or its affairs are taken over by public authorities, then the Trustee may (i) appoint a successor Sponsor at rates of compensation deemed by the Trustee to be reasonable and not exceeding amounts prescribed by the SEC, (ii) terminate the Trust Agreement and liquidate the Portfolios as provided therein or (iii) continue to act as Trustee without terminating the Trust Agreement.

Trustee. The Trustee is The Bank of New York Mellon, a trust company organized under the laws of New York. The Bank of New York Mellon has its principal unit investment trust division offices at 240 Greenwich Street - 22W, New York, New York 10286, (800) 856-8487. If you have questions regarding your account or your Portfolio, please contact the Trustee at its principal unit

investment trust division offices or your financial adviser. The Sponsor does not have access to individual account information. The Bank of New York Mellon is subject to supervision and examination by the Superintendent of Banks of the State of New York and the Board of Governors of the Federal Reserve System, and its deposits are insured by the Federal Deposit Insurance Corporation to the extent permitted by law. Additional information regarding the Trustee is set forth in the Information Supplement, including the Trustee's qualifications and duties, its ability to resign, the effect of a merger involving the Trustee and the Sponsor's ability to remove and replace the Trustee. See "Additional Information".

TAXATION

This section summarizes some of the principal U.S. federal income tax consequences of owning Units of the Portfolios. Tax laws and interpretations are subject to change, possibly with retroactive effect. This summary does not describe all of the tax consequences to all taxpayers. For example, this summary generally does not describe your situation if you are a corporation, a non-U.S. person, a broker/dealer, a tax-exempt entity, financial institution, person who marks to market their Units or other investor with special circumstances. In addition, this section does not describe your alternative minimum, state, local or foreign tax consequences of investing in the Portfolios.

This federal income tax summary is based in part on the advice of counsel to the Sponsor. The Internal Revenue Service could disagree with any conclusions set forth in this section. In addition, our counsel was not asked to review the federal income tax treatment of the assets to be deposited in your Portfolio.

Additional information related to taxes is contained in the Information Supplement. As with any investment, you should seek advice based on your individual circumstances from your own tax advisor.

Portfolio Status. Your Portfolio intends to elect and to qualify annually as a "regulated investment company" ("RIC") under the federal tax laws. If your Portfolio qualifies under the tax law as a RIC and distributes its income in

the manner and amounts required by the RIC tax requirements, the Portfolios generally will not pay federal income taxes. But there is no assurance that the distributions made by your Portfolio will eliminate all taxes for every year at the level of your Portfolio.

Distributions. Portfolio distributions are generally taxable. After the end of each year, you will receive a tax statement reporting your Portfolio's distributions, including the amounts of ordinary income distributions and capital gains dividends. Your Portfolio may make taxable distributions to you even in periods during which the value of your Units has declined. Ordinary income distributions are generally taxed at your federal tax rate for ordinary income, however, as further discussed below, certain ordinary income distributions received from your Portfolio may be taxed, under current federal law, at capital gains tax rates. Certain ordinary income dividends on Units that are attributable to qualifying dividends received by your Portfolio from certain corporations may be reported by the Portfolios as being eligible for the dividends received deduction for corporate Unitholders provided certain holding period requirements are met. Income from the Portfolios and gains on the sale of your Units may also be subject to a 3.8% federal tax imposed on net investment income if your adjusted gross income exceeds certain threshold amounts, which currently are \$250,000 in the case of married couples filing joint returns and \$200,000 in the case of single individuals. In addition, your Portfolio may make distributions that represent a return of capital for tax purposes to the extent of the Unitholder's basis in the Units, and any additional amounts in excess of basis would be taxed as a capital gain. Generally, you will treat all capital gains dividends as long-term capital gains regardless of how long you have owned your Units. The tax status of your distributions from your Portfolio is not affected by whether you reinvest your distributions in additional Units or receive them in cash. The income from your Portfolio that you must take into account for federal income tax purposes is not reduced by amounts used to pay a deferred sales charge, if any. The tax laws may require you to treat certain distributions made to you in January as if you had received them on December 31 of the previous year.

A distribution paid by your Portfolio reduces the Portfolios' net asset value per Unit on the date paid by the amount of the distribution. Accordingly, a distribution paid shortly after a purchase of Units by a Unitholder would represent, in substance, a partial return of capital, however, it would be subject to income taxes.

Sale or Redemption of Units. If you sell or redeem your Units, you will generally recognize a taxable gain or loss. To determine the amount of this gain or loss, you must subtract your adjusted tax basis in your Units from the amount you receive for the sale of the Units. Your initial tax basis in your Units is generally equal to the cost of your Units, generally including sales charges. In some cases, however, you may have to adjust your tax basis after you purchase your Units.

Capital Gains and Losses and Certain Ordinary Income Dividends. Net capital gain equals net long-term capital gain minus net short-term capital loss for the taxable year. Capital gain or loss is long-term if the holding period for the asset is more than one year and is short-term if the holding period for the asset is one year or less. You must exclude the date you purchase your Units to determine your holding period. However, if you receive a capital gain dividend from your Portfolio and sell your Units at a loss after holding it for six months or less, the loss will be recharacterized as long-term capital loss to the extent of the capital gain dividend received. The tax rates for capital gains realized from assets held for one year or less are generally the same as for ordinary income.

In certain circumstances, ordinary income dividends received by an individual Unitholder from a RIC such as your Portfolio may be taxed at the same federal rates that apply to net capital gain (as discussed above), provided certain holding period requirements are satisfied and provided the dividends are attributable to qualified dividend income received by a Portfolio itself. Qualified dividend income means dividends paid to the Portfolios (a) by domestic corporations, (b) by foreign corporations that are either (i) incorporated in a possession of the United States or (ii) are eligible for benefits under certain income tax treaties with the United States that include an exchange of information program, or (c) with respect to stock of a foreign corporation that is readily tradeable on an established securities market in the United States. The

Portfolios and the Unitholder must meet certain holding period requirements to qualify Portfolio dividends for this treatment. Income derived from investments in derivatives, fixed-income securities, U.S. real estate investment trusts, passive foreign investment companies, and income received "in lieu of" dividends in a securities lending transactions generally is not eligible for treatment as qualified dividend income. If the qualified dividend income received by the Portfolios is equal to 95% (or a greater percentage) of the Portfolios' gross income (exclusive of net capital gain) in any taxable year, all of the ordinary income dividends paid by the Portfolios will be qualified dividend income. Your Portfolio will provide notice to its Unitholders of the amount of any distribution which may be taken into account as qualified dividend income which is eligible for capital gains tax rates. There is no requirement that tax consequences be taken into account in administering your Portfolio.

In Kind Distributions. Under certain circumstances, as described in this prospectus, you may receive an in kind distribution of Portfolio securities when you redeem your Units. In general, this distribution will be treated as a sale for federal income tax purposes and you will recognize gain or loss, based on the value at that time of the securities and the amount of cash received, and subject to certain limitations on the deductibility of losses under the tax law.

Rollovers and Exchanges. If you elect to have your proceeds from your Portfolio rolled over into a future trust, it would generally be considered a sale for federal income tax purposes and any gain on the sale will be treated as a capital gain, and, in general, any loss will be treated as a capital loss. However, any loss realized on a sale or exchange will be disallowed to the extent that Units disposed of are replaced (including through reinvestment of dividends) within a period of 61 days beginning 30 days before and ending 30 days after disposition of Units or to the extent that the Unitholder, during such period, acquires or enters into an option or contract to acquire, substantially identical stock or securities. In such a case, the basis of the Units acquired will be adjusted to reflect the disallowed loss. The deductibility of capital losses is subject to other limitations in the tax law.

Deductibility of Portfolio Expenses. Expenses incurred and deducted by your Portfolio will generally not be treated as taxable income to you. In certain cases if your Portfolio is not considered "publicly offered" under the Code, each U.S. Unitholder that is either an individual, trust or estate will be treated as having received a taxable distribution from the Portfolios in the amount of that U.S. Unitholder's allocable share of certain of the Portfolios' expenses for the calendar year, and these fees and expenses will be treated as miscellaneous itemized deductions of those U.S. Unitholders. The deductibility of expenses that are characterized as miscellaneous itemized deductions, which include investment expenses, is suspended for tax years beginning prior to January 1, 2026.

Foreign Investors. If you are a foreign investor (i.e., an investor other than a U.S. citizen or resident or a U.S. corporation, partnership, estate or trust), generally, subject to applicable tax treaties, distributions to you from your Portfolio will be characterized as dividends for federal income tax purposes (other than dividends that your Portfolio reports as capital gain dividends) and will be subject to U.S. income taxes, including withholding taxes, subject to certain exceptions described below. You may be eligible under certain income tax treaties for a reduction in withholding rates. However, distributions received by a foreign investor from your Portfolio that are properly reported by the trust as capital gain dividends, interest-related dividends paid by the Portfolios from its qualified net interest income from U.S. sources and short-term capital gain dividends, may not be subject to U.S. federal income taxes, including withholding taxes, provided that your Portfolio makes certain elections and certain other conditions are met.

The Foreign Account Tax Compliance Act ("FATCA"). A 30% withholding tax on your Portfolio's distributions generally applies if paid to a foreign entity unless: (i) if the foreign entity is a "foreign financial institution" as defined under FATCA, the foreign entity undertakes certain due diligence, reporting, withholding, and certification obligations, (ii) if the foreign entity is not a "foreign financial institution," it identifies certain of its U.S. investors or (iii) the foreign entity is otherwise excepted under FATCA. If required under the rules above

and subject to the applicability of any intergovernmental agreements between the United States and the relevant foreign country, withholding under FATCA may apply. Under existing regulations, FATCA withholding on gross proceeds from the sale of Units and capital gain distributions from your Portfolio took effect on January 1, 2019; however, recently proposed U.S. tax regulations eliminate FATCA withholding on such types of payments. Taxpayers generally may rely on these proposed Treasury Regulations until final Treasury Regulations are issued. If withholding is required under FATCA on a payment related to your Units, investors that otherwise would not be subject to withholding (or that otherwise would be entitled to a reduced rate of withholding) on such payment generally will be required to seek a refund or credit from the IRS to obtain the benefit of such exemption or reduction. Your Portfolio will not pay any additional amounts in respect of amounts withheld under FATCA. You should consult your tax advisor regarding the effect of FATCA based on your individual circumstances.

Foreign Tax Credit. If your Portfolio invests in any foreign securities, the tax statement that you receive may include an item showing foreign taxes your Portfolio paid to other countries. In this case, dividends taxed to you will include your share of the taxes your Portfolio paid to other countries. If more than 50% of the value of the Portfolios' total assets at the end of a fiscal year is invested in foreign securities, the Portfolios may elect to "pass-through" to the Unitholders the amount of foreign income tax paid by the Portfolios in lieu of deducting such amount in determining its investment company taxable income. In such a case, Unitholders will be required (i) to include in gross income, even though not actually received, their respective pro rata shares of the foreign income tax paid by the Portfolios that are attributable to any distributions they receive; and (ii) either to deduct their pro rata share of foreign tax in computing their taxable income or to use it (subject to various limitations) as a foreign tax credit against federal income tax (but not both). No deduction for foreign tax may be claimed by a non-corporate Unitholder who does not itemize deductions or who is subject to the alternative minimum tax. Unitholders may be unable to claim a credit for the full amount of their proportionate shares of the foreign income tax paid by the

Portfolios due to certain limitations that may apply. The Portfolios reserve the right not to pass-through to its Unitholders the amount of foreign income taxes paid by the Portfolios.

Backup Withholding. By law, your Portfolio must withhold as backup withholding a percentage (currently 24%) of your taxable distributions and redemption proceeds if you do not provide your correct social security or taxpayer identification number and certify that you are not subject to backup withholding, or if the IRS instructs your Portfolio to do so.

Investors should consult their advisors concerning the federal, state, local and foreign tax consequences of investing in the Portfolios'.

PORTFOLIO OPERATING EXPENSES

General. The fees and expenses of your Portfolio will generally accrue on a daily basis. Portfolio operating fees and expenses are generally paid out of the Income Account to the extent funds are available, and then from the Capital Account. The deferred sales charge, creation and development fee and organization costs are generally paid out of the Capital Account of your Portfolio. It is expected that Securities will be sold to pay these amounts which will result in capital gains or losses to Unitholders. See "Taxation". These sales will reduce future income distributions. The Sponsor's, Supervisor's and Trustee's fees may be increased without approval of the Unitholders by amounts not exceeding proportionate increases under the category "Services Less Rent of Shelter" in the Consumer Price Index for All Urban Consumers or, if this category is not published, in a comparable category.

Organization Costs. You and the other Unitholders will bear all or a portion of the organization costs and charges incurred in connection with the establishment of your Portfolio. These costs and charges will include the cost of the preparation, printing and execution of the trust agreement, registration statement and other documents relating to your Portfolio, federal and state registration fees and costs, the initial fees and expenses of the Trustee, and legal and auditing expenses. The Public Offering Price of Units includes the estimated amount of these costs.

The Trustee will deduct these expenses from your Portfolio's assets at the end of the initial offering period.

Creation and Development Fee. The Sponsor will receive a fee from your Portfolio for creating and developing the Portfolio, including determining the Portfolio's objectives, policies, composition and size, selecting service providers and information services and for providing other similar administrative and ministerial functions. The creation and development fee is a charge of \$0.05 per Unit. The Trustee will deduct this amount from your Portfolio's assets as of the close of the initial offering period. No portion of this fee is applied to the payment of distribution expenses or as compensation for sales efforts. This fee will not be deducted from proceeds received upon a repurchase, redemption or exchange of Units before the close of the initial public offering period.

Trustee's Fee. For its services the Trustee will receive the fee from your Portfolio set forth in the "Fee Table" (which includes the estimated amount of miscellaneous Portfolio expenses). The Trustee benefits to the extent there are funds in the Capital and Income Accounts since these Accounts are non-interest bearing to Unitholders and the amounts earned by the Trustee are retained by the Trustee. Part of the Trustee's compensation for its services to your Portfolio is expected to result from the use of these funds.

Compensation of Sponsor and Supervisor. The Sponsor and the Supervisor, which is an affiliate of the Sponsor, will receive the annual fees for providing bookkeeping and administrative services and portfolio supervisory services set forth in the "Fee Table". These fees may exceed the actual costs of providing these services to your Portfolio but at no time will the total amount received for these services rendered to all Invesco unit investment trusts in any calendar year exceed the aggregate cost of providing these services in that year.

Miscellaneous Expenses. The following additional charges are or may be incurred by your Portfolio: (a) normal expenses (including the cost of mailing reports to Unitholders) incurred in connection with the operation of the Portfolio, (b) fees of the Trustee for extraordinary services, (c) expenses of the Trustee (including legal and auditing expenses) and of counsel designated by the

Sponsor, (d) various governmental charges, (e) expenses and costs of any action taken by the Trustee to protect the Portfolio and the rights and interests of Unitholders, (f) indemnification of the Trustee for any loss, liability or expenses incurred in the administration of the Portfolio without negligence, bad faith or wilful misconduct on its part, (g) foreign custodial and transaction fees (which may include compensation paid to the Trustee or its subsidiaries or affiliates), (h) costs associated with liquidating the securities held in the Portfolio, (i) any offering costs incurred after the end of the initial offering period and (j) expenditures incurred in contacting Unitholders upon termination of the Portfolio. Your Portfolio may pay the expenses of updating its registration statement each year.

Fund Expenses. Your Portfolio will also bear the expenses of the underlying funds. While your Portfolio will not pay these expenses directly out of its assets, an estimate of these expenses is shown in your Portfolio's "Estimated Annual Expenses" in the "Fee Table" to illustrate the impact of these expenses. This estimate is based upon each underlying fund's annual operating expenses for the most recent fiscal year. Each underlying fund's annual operating expense amount is subject to change in the future.

OTHER MATTERS

Legal Opinions. The legality of the Units offered hereby has been passed upon by Morgan, Lewis & Bockius LLP. Dorsey & Whitney LLP has acted as counsel to the Trustee.

Independent Registered Public Accounting Firm. The financial statements included in this prospectus have been so included in reliance upon the report of Grant Thornton LLP, independent registered public accountants, upon the authority of said firm as experts in accounting and auditing.

ADDITIONAL INFORMATION

This prospectus does not contain all the information set forth in the registration statements filed by your Portfolio with the SEC under the Securities Act of 1933 and the Investment Company Act of 1940 (file no. 811-02754). The Information Supplement, which has

been filed with the SEC and is incorporated herein by reference, includes more detailed information concerning the Securities, investment risks and general information about the Portfolios. Reports and other information about your Portfolio are available on the EDGAR Database on the SEC's Internet site at <http://www.sec.gov>. Copies of this information may be obtained, after paying a duplication fee, by electronic request at the following e-mail address: publicinfo@sec.gov or by writing the SEC's Public Reference Section, Washington, DC 20549-0102.

RISK FACTORS

Closed-End Funds. Closed-end funds' portfolios are managed and their shares are generally listed on a securities exchange. The net asset value of closed-end fund shares will fluctuate with changes in the value of the underlying securities that the closed-end fund owns. In addition, for various reasons closed-end fund shares frequently trade at a discount from their net asset value in the secondary market. The amount of such discount from net asset value is subject to change from time to time in response to various factors. Closed-end funds' articles of incorporation may contain certain anti-takeover provisions that may have the effect of inhibiting a fund's possible conversion to open-end status and limiting the ability of other persons to acquire control of a fund. In certain circumstances, these provisions might also inhibit the ability of stockholders (including the Portfolios) to sell their shares at a premium over prevailing market prices. This characteristic is a risk separate and distinct from the risk that a fund's net asset value will decrease. In particular, this characteristic would increase the loss or reduce the return on the sale of those closed-end fund shares that were purchased by your Portfolio at a premium. In the unlikely event that a closed-end fund converts to open-end status at a time when its shares are trading at a premium there would be an immediate loss in value to your Portfolio since shares of open-end funds trade at net asset value. Certain closed-end funds may have in place or may put in place in the future plans pursuant to which the fund may repurchase its own shares in the marketplace. Typically, these plans are put in place in an attempt by a fund's board of directors to reduce a discount on its share price. To the extent that such a plan is implemented and shares owned by your Portfolio are repurchased by a fund, the Portfolios' position in that fund will be reduced and the cash will be distributed.

Your Portfolio is prohibited from subscribing to a rights offering for shares of any of the closed-end funds in which it invests. In the event of a rights offering for additional shares of a fund, Unitholders should expect that your Portfolio will, at the completion of the offer, own a smaller proportional interest in such fund that would otherwise be the case. It is not possible to determine the extent of this

dilution in share ownership without knowing what proportion of the shares in a rights offering will be subscribed. This may be particularly serious when the subscription price per share for the offer is less than the fund's net asset value per share. Assuming that all rights are exercised and there is no change in the net asset value per share, the aggregate net asset value of each shareholder's shares of common stock should decrease as a result of the offer. If a fund's subscription price per share is below that fund's net asset value per share at the expiration of the offer, shareholders would experience an immediate dilution of the aggregate net asset value of their shares of common stock as a result of the offer, which could be substantial.

Closed-end funds in your Portfolio may employ structural leverage in the future if its investment policy allows for it. Leveraging (structural or otherwise) can be expected to cause increased price volatility for those fund's shares, and as a result, increased volatility for the price of the Units of a Portfolio. There can be no assurance that a leveraging strategy will be successful during any period in which it is employed.

In limited cases certain closed-end funds may employ an investment strategy which includes derivatives such as forward contracts, options, futures contracts, options on futures contracts and swap agreements or intricate derivative-like features, including reverse convertibles, steeper notes, reference point investments and knockout/knock in features. These strategies may utilize multiple features that affect investment returns differently under various scenarios. Derivatives may be purchased on established exchanges or through privately negotiated transactions. Derivatives can be volatile and involve various types and degrees of risk, depending upon the characteristics of the particular derivative. Derivatives may entail investment exposures that are greater than their cost would suggest, meaning that a small investment in derivatives could have a large potential impact on performance. The market for many derivatives is, or suddenly can become, illiquid. Changes in liquidity may result in significant, rapid and unpredictable changes in the prices for derivatives. Structured notes and other related instruments carry risks similar to those of more traditional derivatives such as futures, forward and option

contracts. Structured instruments may entail a greater degree of market risk and volatility than other types of debt obligations. There can be no assurance that a derivative based strategy will be successful during any period in which it is employed.

An exclusion has been claimed for your Portfolio from the definition of the term “commodity pool operator” under the Commodity Exchange Act (“CEA”) and, therefore, your Portfolio is not subject to registration as a commodity pool operator under the CEA.

High-Yield Securities. An investment in Units of the Portfolios should be made with an understanding of the risks that an investment in “high-yield, high-risk” debt obligations or “junk” obligations may entail, including increased credit risks and the risk that the value of the Units will decline, and may decline precipitously, with increases in interest rates. In recent years there have been wide fluctuations in interest rates and thus in the value of debt obligations generally. Certain of the securities included in the funds in the Portfolios may be subject to greater market fluctuations and risk of loss of income and principal than are investments in lower-yielding, higher-rated securities, and their value may decline precipitously because of increases in interest rates, not only because the increases in rates generally decrease values, but also because increased rates may indicate a slowdown in the economy and a decrease in the value of assets generally that may adversely affect the credit of issuers of high-yield, high-risk securities resulting in a higher incidence of defaults among high-yield, high-risk securities. A slowdown in the economy, or a development adversely affecting an issuer’s creditworthiness, may result in the issuer being unable to maintain earnings or sell assets at the rate and at the prices, respectively, that are required to produce sufficient cash flow to meet its interest and principal requirements. For an issuer that has outstanding both senior commercial bank debt and subordinated high-yield, high-risk securities, an increase in interest rates will increase that issuer’s interest expense insofar as the interest rate on the bank debt is fluctuating. However, many leveraged issuers enter into interest rate protection agreements to fix or cap the interest rate on a large portion of their bank debt. This reduces exposure to increasing rates, but reduces the benefit to the issuer of declining

rates. The Sponsor cannot predict future economic policies or their consequences or, therefore, the course or extent of any similar market fluctuations in the future.

“High-yield” or “junk” securities, the generic names for securities rated below BBB- by Standard & Poor’s, or below Baa3 by Moody’s, are frequently issued by corporations in the growth stage of their development, by established companies whose operations or industries are depressed or by highly leveraged companies purchased in leveraged buyout transactions. The market for high-yield securities is very specialized and investors in it have been predominantly financial institutions. High-yield securities are generally not listed on a national securities exchange. Trading of high-yield securities, therefore, takes place primarily in over-the-counter markets that consist of groups of dealer firms that are typically major securities firms. Because the high-yield security market is a dealer market, rather than an auction market, no single obtainable price for a given security prevails at any given time. Prices are determined by negotiation between traders. The existence of a liquid trading market for the securities may depend on whether dealers will make a market in the securities. There can be no assurance that a market will be made for any of the securities, that any market for the securities will be maintained or of the liquidity of the securities in any markets made. Not all dealers maintain markets in all high-yield securities. Therefore, since there are fewer traders in these securities than there are in “investment grade” securities, the bid-offer spread is usually greater for high-yield securities than it is for investment grade securities. The price at which the securities may be sold and the value of your Portfolio will be adversely affected if trading markets for the securities are limited or absent. If the rate of redemptions is great, the value of your Portfolio may decline to a level that requires liquidation.

Lower-rated securities tend to offer higher yields than higher-rated securities with the same maturities because the creditworthiness of the issuers of lower-rated securities may not be as strong as that of other issuers. Moreover, if a security is recharacterized as equity by the Internal Revenue Service for federal income tax purposes, the issuer’s interest deduction with respect to the security will be disallowed and this

disallowance may adversely affect the issuer's credit rating. Because investors generally perceive that there are greater risks associated with the lower-rated securities in the funds in a Portfolio, the yields and prices of these securities tend to fluctuate more than higher-rated securities with changes in the perceived quality of the credit of their issuers. In addition, the market value of high-yield, high-risk securities may fluctuate more than the market value of higher-rated securities since these securities tend to reflect short-term credit development to a greater extent than higher-rated securities. Lower-rated securities generally involve greater risks of loss of income and principal than higher-rated securities. Issuers of lower-rated securities may possess fewer creditworthiness characteristics than issuers of higher-rated securities and, especially in the case of issuers whose obligations or credit standing have recently been downgraded, may be subject to claims by debtholders, owners of property leased to the issuer or others which, if sustained, would make it more difficult for the issuers to meet their payment obligations. High-yield, high-risk securities are also affected by variables such as interest rates, inflation rates and real growth in the economy. Therefore, investors should consider carefully the relative risks associated with investment in securities that carry lower ratings.

The value of the shares of the closed-end funds reflects the value of the portfolio securities, including the value (if any) of securities in default. Should the issuer of any security default in the payment of principal or interest, the closed-end funds in your Portfolio may incur additional expenses seeking payment on the defaulted security. Because amounts (if any) recovered by the funds in payment under the defaulted security may not be reflected in the value of the fund shares until actually received by the funds, and depending upon when a Unitholder purchases or sells his or her Units, it is possible that a Unitholder would bear a portion of the cost of recovery without receiving any portion of the payment recovered.

High-yield, high-risk securities are generally subordinated obligations. The payment of principal (and premium, if any), interest and sinking fund requirements

with respect to subordinated obligations of an issuer is subordinated in right of payment to the payment of senior obligations of the issuer. Senior obligations generally include most, if not all, significant debt obligations of an issuer, whether existing at the time of issuance of subordinated debt or created thereafter. Upon any distribution of the assets of an issuer with subordinated obligations upon dissolution, total or partial liquidation or reorganization of or similar proceeding relating to the issuer, the holders of senior indebtedness will be entitled to receive payment in full before holders of subordinated indebtedness will be entitled to receive any payment. Moreover, generally no payment with respect to subordinated indebtedness may be made while there exists a default with respect to any senior indebtedness. Thus, in the event of insolvency, holders of senior indebtedness of an issuer generally will recover more, ratably, than holders of subordinated indebtedness of that issuer.

Obligations that are rated lower than "BBB-" by Standard & Poor's, or "Baa3" by Moody's, respectively, should be considered speculative as such ratings indicate a quality of less than investment grade. Investors should carefully review the objective of your Portfolio and consider their ability to assume the risks involved before making an investment in a Portfolio.

Senior Loans. Certain of the closed-end funds in the Senior Loan and Limited Duration Portfolio invest in senior loans issued by banks, other financial institutions, and other issuers to corporations, partnerships, limited liability companies and other entities to finance leveraged buyouts, recapitalizations, mergers, acquisitions, stock repurchases, debt refinancings and, to a lesser extent, for general operating and other purposes. Senior loans in which the closed-end funds invest:

- o generally are of below investment grade credit quality;
- o may be unrated at the time of investment;
- o generally are not registered with the Securities and Exchange Commission or any state securities commission; and
- o generally are not listed on any securities exchange.

An investment by closed-end funds in senior loans involves risk that the borrowers under senior loans may default on their obligations to pay principal or interest when due. Although senior loans may be secured by specific collateral, there can be no assurance that liquidation of collateral would satisfy the borrower's obligation in the event of non-payment or that such collateral could be readily liquidated. Senior loans are typically structured as floating rate instruments in which the interest rate payable on the obligation fluctuates with interest rate changes. As a result, the yield on closed-end funds investing in senior loans will generally decline in a falling interest rate environment and increase in a rising interest rate environment.

The amount of public information available on senior loans generally will be less extensive than that available for other types of assets. No reliable, active trading market currently exists for many senior loans, although a secondary market for certain senior loans has developed over the past several years. Senior loans are thus relatively illiquid. Liquidity relates to the ability of a closed-end fund to sell an investment in a timely manner at a price approximately equal to its value on the closed-end fund's books. The illiquidity of senior loans may impair a closed-end fund's ability to realize the full value of its assets in the event of a voluntary or involuntary liquidation of such assets. Because of the lack of an active trading market, illiquid securities are also difficult to value and prices provided by external pricing services may not reflect the true value of the securities. However, many senior loans are of a large principal amount and are held by a large number of financial institutions. To the extent that a secondary market does exist for certain senior loans, the market may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods. The market for senior loans could be disrupted in the event of an economic downturn or a substantial increase or decrease in interest rates. This could result in increased volatility in the market and in your Portfolios' net asset value.

If legislation or state or federal regulators impose additional requirements or restrictions on the ability of financial institutions to make loans that are considered highly leveraged transactions, the availability of senior

loans for investment by the closed-end funds may be adversely affected. In addition, such requirements or restrictions could reduce or eliminate sources of financing for certain borrowers. This would increase the risk of default. If legislation or federal or state regulators require financial institutions to dispose of senior loans that are considered highly leveraged transactions or subject such senior loans to increased regulatory scrutiny, financial institutions may determine to sell such senior loans. Such sales could result in depressed prices. If a closed-end fund attempts to sell a senior loan at a time when a financial institution is engaging in such a sale, the price a closed-end fund could get for the senior loan may be adversely affected.

Some senior loans are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate the senior loans to presently existing or future indebtedness of the borrower or take other action detrimental to lenders. Such court action could under certain circumstances include invalidation of senior loans. Any lender, which could include a closed-end fund, is subject to the risk that a court could find the lender liable for damages in a claim by a borrower arising under the common laws of tort or contracts or anti-fraud provisions of certain securities laws for actions taken or omitted to be taken by the lenders under the relevant terms of a loan agreement or in connection with actions with respect to the collateral underlying the senior loan.

Foreign Issuers. Since certain of the underlying securities held by certain of the closed-end funds in the Portfolios are issued by foreign issuers, an investment in the Portfolios involves certain investment risks that are different in some respects from an investment in a portfolio which invests entirely in the securities of domestic issuers. These investment risks include future political or governmental restrictions which might adversely affect the payment or receipt of payment of dividends, interest, or principal on the relevant securities, the possibility that the financial condition of the issuers of the securities may become impaired or that the general condition of the relevant stock market may worsen (both of which would contribute directly to a decrease in the value of the securities and thus in the value of the Units), the limited liquidity and relatively small market

capitalization of the relevant securities market, expropriation or confiscatory taxation, economic uncertainties and foreign currency devaluations and fluctuations. In addition, for foreign issuers that are not subject to the reporting requirements of the Securities Exchange Act of 1934, there may be less publicly available information than is available from a domestic issuer. In addition, foreign issuers are not necessarily subject to uniform accounting, auditing and financial reporting standards, practices and requirements comparable to those applicable to domestic issuers. The securities of many foreign issuers are less liquid and their prices more volatile than securities of comparable domestic issuers. In addition, fixed brokerage commissions and other transaction costs in foreign securities markets are generally higher than in the United States and there is generally less government supervision and regulation of exchanges, brokers and issuers in foreign countries than there is in the United States.

Securities issued by non-U.S. issuers may pay income in foreign currencies or principally trade in foreign currencies. Therefore, there is a risk that the U.S. dollar value of these securities will vary with fluctuations in the U.S. dollar foreign exchange rates for the various securities.

There can be no assurance that exchange control regulations might not be adopted in the future which might adversely affect payment to the closed-end funds or Portfolios. The adoption of exchange control regulations and other legal restrictions could have an adverse impact on the marketability of international securities in the closed-end funds held by your Portfolio. In addition, restrictions on the settlement of transactions on either the purchase or sale side, or both, could cause delays or increase the costs associated with the purchase and sale of the foreign Securities and correspondingly could affect the price of the Units.

Investors should be aware that it may not be possible to buy all securities at the same time because of the unavailability of any security, and restrictions relating to the purchase of a security by reason of the federal securities laws or otherwise.

Foreign securities may not be registered under the Securities Act of 1933 and may not be exempt from the registration requirements of such Act. Sales of non-exempt securities by a closed-end fund in the United States securities markets are subject to severe restrictions and may not be practicable. Accordingly, sales of these securities by a closed-end fund will generally be effected only in foreign securities markets. Investors should realize that the securities in the closed-end funds might be traded in foreign countries where the securities markets are not as developed or efficient and may not be as liquid as those in the United States. The value of the securities will be adversely affected if trading markets for the securities are limited or absent.

Emerging Markets. Certain of the closed-end funds in the Senior Loan and Limited Duration Portfolio have the flexibility to invest in securities issued by entities located in emerging markets. Accordingly, an investment in Units of your Portfolio should be made with an understanding of the risks inherent with investing in certain smaller and emerging markets.

Investing. Compared to more mature markets, some emerging markets may have a low level of regulation, enforcement of regulations and monitoring of investors' activities. Those activities may include practices such as trading on material non-public information. The securities markets of developing countries are not as large as the more established securities markets and have substantially less trading volume, resulting in a lack of liquidity and high price volatility. There may be a high concentration of market capitalization and trading volume in a small number of issuers representing a limited number of industries as well as a high concentration of investors and financial intermediaries. These factors may adversely affect the timing and pricing of the acquisition or disposal of securities. In certain emerging markets, registrants are not subject to effective government supervision nor are they always independent from issuers. The possibility of fraud, negligence, undue influence being exerted by the issuer or refusal to recognize ownership exists, which, along with other factors, could result in the registration of a shareholding being completely lost. Investors should therefore be aware that certain of the closed-end funds in your Portfolio could suffer loss arising

from these registration problems. In addition, the legal remedies in emerging markets are often more limited than the remedies available in the United States.

Liquidity/Settlement. Practices pertaining to the settlement of securities transactions in emerging markets involve higher risks than those in developed markets, in large part because of the need to use brokers and counterparties who are less well capitalized, and custody and registration of assets in some countries may be unreliable. As a result, brokerage commissions and other fees are generally higher in emerging markets and the procedures and rules governing foreign transactions and custody may involve delays in payment, delivery or recovery of money or investments. Delays in settlement could result in investment opportunities being missed if certain of the closed-end funds in your Portfolio are unable to acquire or dispose of a security. Certain foreign investments may also be less liquid and more volatile than U.S. investments, which may mean at times that such investments are unable to be sold at desirable prices.

Political. Political and economic structures in emerging markets often change rapidly, which may cause instability. In adverse social and political circumstances, governments have been involved in policies of expropriation, confiscatory taxation, nationalization, intervention in the securities market and trade settlement, and imposition of foreign investment restrictions and exchange controls, and these could be repeated in the future. In addition to withholding taxes on investment income, some governments in emerging markets may impose different capital gains taxes on foreign investors. Foreign investments may also be subject to the risks of seizure by a foreign government and the imposition of restrictions on the exchange or export of foreign currency. Additionally, some governments exercise substantial influence over the private economic sector and the political and social uncertainties that exist for many developing countries are considerable.

Trade. Another risk common to most developing countries is that the economy is heavily export oriented and, accordingly, is dependent upon international trade. The existence of overburdened infrastructures and obsolete financial systems also presents risks in certain countries, as do environmental problems. Certain

economies also depend to a large degree upon exports of primary commodities and, therefore, are vulnerable to changes in commodity prices which, in turn, may be affected by a variety of factors.

Discount Securities. Certain of the securities held by the closed-end funds in your Portfolio may have been acquired at a market discount from par value at maturity. The coupon interest rates on the discount securities at the time they were purchased and deposited in the funds were lower than the current market interest rates for newly issued securities of comparable rating and type. If such interest rates for newly issued comparable securities increase, the market discount of previously issued securities will become greater, and if such interest rates for newly issued comparable securities decline, the market discount of previously issued securities will be reduced, other things being equal. Investors should also note that the value of securities purchased at a market discount will increase in value faster than securities purchased at a market premium if interest rates decrease. Conversely, if interest rates increase, the value of securities purchased at a market discount will decrease faster than securities purchased at a market premium. In addition, if interest rates rise, the prepayment risk of higher yielding, premium securities and the prepayment benefit for lower yielding, discount securities will be reduced. Market discount attributable to interest changes does not indicate a lack of market confidence in the issue.

Premium Securities. Certain of the securities held by the closed-end funds in your Portfolio may have been acquired at a market premium from par value at maturity. The coupon interest rates on the premium securities at the time they were purchased by the fund were higher than the current market interest rates for newly issued securities of comparable rating and type. If such interest rates for newly issued and otherwise comparable securities decrease, the market premium of previously issued securities will be increased, and if such interest rates for newly issued comparable securities increase, the market premium of previously issued securities will be reduced, other things being equal. The current returns of securities trading at a market premium are initially higher than the current returns of comparable securities of a similar type issued at currently prevailing interest

rates because premium securities tend to decrease in market value as they approach maturity when the face amount becomes payable. Because part of the purchase price is thus returned not at maturity but through current income payments, early redemption of a premium security at par or early prepayments of principal will result in a reduction in yield. Redemption pursuant to call provisions generally will, and redemption pursuant to sinking fund provisions may, occur at times when the redeemed securities have an offering side valuation which represents a premium over par or for original issue discount securities a premium over the accreted value.

Liquidity. Whether or not the securities in your Portfolio are listed on an exchange, the securities may delist from the exchange or principally trade in an over-the-counter market. As a result, the existence of a liquid trading market could depend on whether dealers will make a market in the securities. We cannot guarantee that dealers will maintain a market or that any market will be liquid. The value of the securities could fall if trading markets are limited or absent.

Additional Units. The Sponsor may create additional Units of your Portfolio by depositing into your Portfolio additional securities or cash with instructions to purchase additional securities. A deposit could result in a dilution of your investment and anticipated income because of fluctuations in the price of the securities between the time of the deposit and the purchase of the securities and because your Portfolio will pay brokerage or acquisition fees.

Voting. Only the Trustee may sell or vote the securities in the Portfolios. While you may sell or redeem your Units, you may not sell or vote the securities in your Portfolio. The Trustee will vote the underlying funds in the same general proportion as shares held by other shareholders.

THE PORTFOLIO

Investors should note that the selection criteria were applied to the Securities for inclusion in your Portfolio prior to the Initial Date of Deposit. Should a Security no longer meet the criteria used for selection for your Portfolio, such Security will not as a result thereof be removed from the Portfolios.

SPONSOR INFORMATION

Invesco Capital Markets, Inc. is the Sponsor of your Portfolio. The Sponsor is a wholly owned subsidiary of Invesco Advisers, Inc. (“Invesco Advisers”). Invesco Advisers is an indirect wholly owned subsidiary of Invesco Ltd., a leading independent global investment manager that provides a wide range of investment strategies and vehicles to its retail, institutional and high net worth clients around the globe. The Sponsor’s principal office is located at 11 Greenway Plaza, Houston, Texas 77046-1173. As of December 31, 2023, the total stockholders’ equity of Invesco Capital Markets, Inc. was \$54,952,802.95 (unaudited). The current assets under management and supervision by Invesco Ltd. and its affiliates were valued at approximately \$1,585.3 billion as of December 31, 2023. (This paragraph relates only to the Sponsor and not to your Portfolio or to any other Series thereof. The information is included herein only for the purpose of informing investors as to the financial responsibility of the Sponsor and its ability to carry out its contractual obligations. More detailed financial information will be made available by the Sponsor upon request).

The Sponsor and your Portfolio have adopted a code of ethics requiring Invesco Ltd.’s employees who have access to information on Portfolio transactions to report personal securities transactions. The purpose of the code is to avoid potential conflicts of interest and to prevent fraud, deception or misconduct with respect to your Portfolio.

If the Sponsor shall fail to perform any of its duties under the Trust Agreement or become incapable of acting or shall become bankrupt or its affairs are taken over by public authorities, then the Trustee may (i) appoint a successor Sponsor at rates of compensation deemed by the Trustee to be reasonable and not exceeding amounts prescribed by the Securities and Exchange Commission, (ii) terminate the Trust Agreement and liquidate your Portfolio as provided therein or (iii) continue to act as Trustee without terminating the Trust Agreement.

TRUSTEE INFORMATION

The Trustee is The Bank of New York Mellon, a trust company organized under the laws of New York. The Bank of New York Mellon has its principal unit investment

trust division offices at 240 Greenwich Street - 22W, New York, New York 10286, (800) 856-8487. The Bank of New York Mellon is subject to supervision and examination by the Superintendent of Banks of the State of New York and the Board of Governors of the Federal Reserve System, and its deposits are insured by the Federal Deposit Insurance Corporation to the extent permitted by law.

The duties of the Trustee are primarily ministerial in nature. It did not participate in the selection of Securities for the Portfolios.

In accordance with the Trust Agreement, the Trustee shall keep proper books of record and account of all transactions at its office for your Portfolio. Such records shall include the name and address of, and the number of Units of the Portfolios held by, every Unitholder. Such books and records shall be open to inspection by any Unitholder at all reasonable times during the usual business hours. The Trustee shall make such annual or other reports as may from time to time be required under any applicable state or federal statute, rule or regulation. The Trustee is required to keep a certified copy or duplicate original of the Trust Agreement on file in its office available for inspection at all reasonable times during the usual business hours by any Unitholder, together with a current list of the Securities held in the Portfolio.

Under the Trust Agreement, the Trustee or any successor trustee may resign and be discharged of its responsibilities created by the Trust Agreement by executing an instrument in writing and filing the same with the Sponsor. The Trustee or successor trustee must mail a copy of the notice of resignation to all Unitholders then of record, not less than 60 days before the date specified in such notice when such resignation is to take effect. The Sponsor upon receiving notice of such resignation is obligated to appoint a successor trustee promptly. If, upon such resignation, no successor trustee has been appointed and has accepted the appointment within 30 days after notification, the retiring Trustee may apply to a court of competent jurisdiction for the appointment of a successor. The Sponsor may remove the Trustee and appoint a successor trustee as provided in the Trust Agreement at any time with or without cause. Notice of such removal and appointment shall be mailed to each

Unitholder by the Sponsor. Upon execution of a written acceptance of such appointment by such successor trustee, all the rights, powers, duties and obligations of the original trustee shall vest in the successor. The resignation or removal of a Trustee becomes effective only when the successor trustee accepts its appointment as such or when a court of competent jurisdiction appoints a successor trustee.

Any corporation into which a Trustee may be merged or with which it may be consolidated, or any corporation resulting from any merger or consolidation to which a Trustee shall be a party, shall be the successor trustee. The Trustee must be a banking corporation organized under the laws of the United States or any state and having at all times an aggregate capital, surplus and undivided profits of not less than \$5,000,000.

TAXATION

The prospectus contains a discussion of certain U.S. federal income tax issues concerning your Portfolio and the purchase, ownership and disposition of your Portfolio's Units. The discussion below supplements the prospectus discussion and is qualified in its entirety by the prospectus discussion. Prospective investors should consult their own tax advisors with regard to the federal tax consequences of the purchase, ownership, or disposition of Portfolio Units, as well as the tax consequences arising under the laws of any state, locality, non-U.S. country, or other taxing jurisdiction.

The federal income tax summary below and in the prospectus is based in part on the advice of counsel to the Sponsor. The Internal Revenue Service could disagree with any conclusions set forth in these discussions. In addition, our counsel was not asked to review, and has not reached a conclusion with respect to the federal income tax treatment of the assets to be deposited in your Portfolio.

Each Portfolio intends to elect and to qualify annually as a regulated investment company under the Internal Revenue Code of 1986, as amended (the "Code") and to comply with applicable distribution requirements so that it will not pay federal income tax on income and capital gains distributed to its Unitholders.

To qualify for the favorable U.S. federal income tax treatment generally accorded to regulated investment companies, your Portfolio must, among other things, (a) derive in each taxable year at least 90% of its gross income from dividends, interest, payments with respect to securities loans and gains from the sale or other disposition of stock, securities or foreign currencies or other income derived with respect to its business of investing in such stock, securities or currencies, and net income from qualified publicly traded partnerships; (b) diversify its holdings so that, at the end of each quarter of the taxable year, (i) at least 50% of the market value of the Portfolios' assets is represented by cash and cash items (including receivables), U.S. government securities, the securities of other regulated investment companies and other securities, with such other securities of any one issuer generally limited for the purposes of this calculation to an amount not greater than 5% of the value of the Portfolios' total assets and not greater than 10% of the outstanding voting securities of such issuer, and (ii) not more than 25% of the value of its total assets is invested in the securities (other than U.S. government securities or the securities of other regulated investment companies) of any one issuer, or two or more issuers which a Portfolio controls (by owning 20% or more of the issuer's outstanding voting securities) and which are engaged in the same, similar or related trades or businesses, or the securities of qualified publicly traded partnerships; and (c) distribute at least 90% of its investment company taxable income (which includes, among other items, dividends, interest and net short-term capital gains in excess of net long-term capital losses but excludes net capital gain, if any) and at least 90% of its net tax-exempt interest income, if any, each taxable year.

As a regulated investment company, your Portfolio generally will not be subject to U.S. federal income tax on its investment company taxable income (as that term is defined in the Code, but without regard to the deduction for dividends paid) and net capital gain (the excess of net long-term capital gain over net short-term capital loss), if any, that it distributes to Unitholders. Your Portfolio intends to distribute to its Unitholders, at least annually, substantially all of its investment company taxable income and net capital gain. If your Portfolio retains any net capital

gain or investment company taxable income, it will generally be subject to federal income tax at regular corporate rates on the amount retained. In addition, amounts not distributed on a timely basis in accordance with a calendar year distribution requirement are subject to a nondeductible 4% excise tax unless, generally, your Portfolio distributes during each calendar year an amount equal to the sum of (1) at least 98% of its ordinary income (not taking into account any capital gains or losses) for the calendar year, (2) at least 98.2% of its capital gains in excess of its capital losses (adjusted for certain ordinary losses) for the one-year period ending October 31 of the calendar year, and (3) any ordinary income and capital gains for previous years that were not distributed or taxed during those years. To prevent application of the excise tax, your Portfolio intends to make its distributions in accordance with the calendar year distribution requirement. Further, if your Portfolio retains any net capital gain, the Portfolio may designate the retained amount as undistributed capital gains in a notice to Unitholders who, if subject to federal income tax on long-term capital gains (i) will be required to include in income for federal income tax purposes, as long-term capital gain, their share of such undistributed amount, and (ii) will be entitled to credit their proportionate share of the tax paid by the Portfolios against their federal income tax liabilities, if any, and to claim refunds to the extent the credit exceeds such liabilities. A distribution will be treated as paid on December 31 of the current calendar year if it is declared by your Portfolio in October, November or December with a record date in such a month and paid by the Portfolios during January of the following calendar year. These distributions will be taxable to Unitholders in the calendar year in which the distributions are declared, rather than the calendar year in which the distributions are received. There is no assurance that distributions made by your Portfolio will be sufficient to eliminate all taxes on the Portfolios for all periods. Your Portfolio may make taxable distributions to you even during periods in which the value of your Units has declined.

If your Portfolio failed to qualify as a regulated investment company or failed to satisfy the 90% distribution requirement in any taxable year, the Portfolios would be taxed as an ordinary corporation on its taxable

income (even if such income were distributed to its Unitholders) and all distributions out of earnings and profits would be taxable to Unitholders as ordinary dividend income.

Your Portfolio may be required to withhold as backup withholding federal income tax at the backup withholding rate on all taxable distributions payable to you if you fail to provide your correct taxpayer identification number or to make required certifications, or if the IRS indicates that you are subject to backup withholding. Backup withholding is not an additional tax. Any amounts withheld may be credited against your federal income tax liability if you provide the required information or certification.

If the Portfolios are is treated as holding directly or indirectly 10 percent or more of the combined value or voting power of the stock of a foreign corporation, and all U.S. shareholders collectively own more than 50 percent of the vote or value of the stock of such corporation, the foreign corporation may be treated as a "controlled foreign corporation" (a "CFC") for U.S. federal income tax purposes. In such circumstances, your Portfolio will be required to include certain types of passive income and certain other types of income relating to insurance, sales and services with related parties and oil related income in the Portfolios' taxable income whether or not such income is distributed.

PORTFOLIO TERMINATION

Your Portfolio may be liquidated at any time by consent of Unitholders representing 66 2/3% of the Units of the Portfolios then outstanding or by the Trustee when the value of the Securities owned by the Portfolios, as shown by any evaluation, is less than \$500,000 (\$3,000,000 if the value of the Portfolios has exceeded \$15,000,000). Your Portfolio will be liquidated by the Trustee in the event that a sufficient number of Units of the Portfolios not yet sold are tendered for redemption by the Sponsor, so that the net worth of the Portfolios would be reduced to less than 40% of the value of the Securities at the time they were deposited in the Portfolios. If your Portfolio is liquidated because of the redemption of unsold Units by the Sponsor, the Sponsor will refund to each purchaser of Units the entire sales charge paid by such purchaser. The Trust Agreement will terminate upon the sale or other disposition

of the last Security held thereunder, but in no event will it continue beyond the Mandatory Termination Date.

Commencing during the period beginning nine business days prior to, and no later than, the Mandatory Termination Date, Securities will begin to be sold in connection with the termination of your Portfolio. The Sponsor will determine the manner, timing and execution of the sales of the Securities. The Sponsor shall direct the liquidation of the Securities in such manner as to effectuate orderly sales and a minimal market impact. In the event the Sponsor does not so direct, the Securities shall be sold within a reasonable period and in such manner as the Trustee, in its sole discretion, shall determine. Unitholders will receive a cash distribution from the sale of the remaining Securities within a reasonable time following the Mandatory Termination Date. The Trustee will deduct from the funds of your Portfolio any accrued costs, expenses, advances or indemnities provided by the Trust Agreement, including estimated compensation of the Trustee, costs of liquidation and any amounts required as a reserve to provide for payment of any applicable taxes or other governmental charges. Any sale of Securities in your Portfolio upon termination may result in a lower amount than might otherwise be realized if such sale were not required at such time. The Trustee will then distribute to each Unitholder of your Portfolio his pro rata share of the balance of the Income and Capital Accounts of the Portfolio.

The Sponsor may, but is not obligated to, offer for sale units of a subsequent series of the Portfolios. There is, however, no assurance that units of any new series of your Portfolio will be offered for sale at that time, or if offered, that there will be sufficient units available for sale to meet the requests of any or all Unitholders.

Within 60 days of the final distribution Unitholders will be furnished a final distribution statement of the amount distributable. At such time as the Trustee in its sole discretion will determine that any amounts held in reserve are no longer necessary, it will make distribution thereof to Unitholders in the same manner.
