This Information Supplement provides additional information concerning the risks and operations of the Portfolios which is not described in the prospectus. You should read this Information Supplement in conjunction with the prospectus. This Information Supplement is not a prospectus but is incorporated into the prospectus by reference. It does not include all of the information that you should consider before investing in a Portfolio. This Information Supplement may not be used to offer or sell Units without the prospectus. You can obtain copies of the prospectus by contacting the Sponsor's unit investment trust division at 3500 Lacey Road, Suite 700, Downers Grove, Illinois 60515-5456, or by contacting your broker. This Information Supplement is dated as of the date of the prospectus. All capitalized terms have been defined in the prospectus.

RISK FACTORS

Price Volatility. Each Portfolio invests in securities of U.S. companies, as well as foreign companies traded on U.S. exchanges, you should understand the risks of investing in securities before purchasing Units. These risks include the risk that the financial condition of the company or the general condition of the securities markets may worsen and the value of the securities (and therefore Units) will fall. Securities are especially susceptible to general market movements. The value of securities often rises or falls rapidly and unpredictably as market confidence and perceptions of companies change. These perceptions are based on factors including expectations regarding government economic policies, inflation, interest rates, economic expansion or contraction, political climates and economic or banking crises. The value of Units will fluctuate with the value of the securities in a Portfolio and may be more or less than the price you originally paid for your Units. As with any investment, we cannot guarantee that the performance of a Portfolio will be positive over any period of time. Because the Portfolios are unmanaged, the Trustee will not sell securities in response to market fluctuations as is common in managed investments.

Dividends. Stocks represent ownership interests in a company and are not obligations of the company. Common stockholders have a right to receive payments from the company that is subordinate to the rights of creditors, bondholders or preferred stockholders of the company. This means that common stockholders have a right to receive dividends only if a company's board of directors declares a dividend and the company has provided for payment of all of its creditors, bondholders and preferred stockholders. If a company issues additional debt securities or preferred stock, the owners of these securities will have a claim against the company's assets before common stockholders if the company declares bankruptcy or liquidates its assets even though the common stock was issued first. As a result, the company may be less willing or able to declare or pay dividends on its common stock.

Foreign Issuers and American Depositary Receipts ("ADRs"). Because the NASDAQ-100 Growth Leaders Portfolio invests in ADRs that represent

securities of non-U.S. issuers, the Portfolio involves additional risks that differ from an investment in solely domestic issuers. ADRs represent receipts for foreign common stock deposited with a custodian (which may include the Trustee). The ADRs in the Portfolio trade in the U.S. in U.S. dollars and are registered with the Securities and Exchange Commission ("SEC"). ADRs generally involve the same types of risks as foreign common stock held directly. These risks include the risk of losses due to future political and economic developments, international trade conditions, foreign withholding taxes and restrictions on foreign investments or exchange of securities, foreign currency fluctuations or restriction on exchange or repatriation of currencies. ADRs may experience less liquidity than the underlying common stocks traded in their home market.

The political, economic and social structures of some foreign countries may be less stable and more volatile than those in the U.S. Investments in these countries may be subject to the risks of internal and external conflicts, currency devaluations, foreign ownership limitations and tax increases. It is possible that a government may take over the assets or operations of a company or impose restrictions on the exchange or export of currency or other assets. Some countries also may have different legal systems that may make it difficult for the Portfolio to vote proxies, exercise investor rights, and pursue legal remedies with respect to its foreign investments. Certain foreign securities may be less liquid (harder to sell) and more volatile than many U.S. securities. Diplomatic and political developments, including rapid and adverse political changes, social instability, regional conflicts, terrorism and war, could affect the economies, industries, and securities and currency markets, and the value of the Portfolio's investments, in non-U.S. countries. No one can predict the impact that these factors could have on the Portfolio's securities. Foreign companies may not be subject to the same disclosure, accounting, auditing and financial reporting standards and practices as U.S. companies. Thus, there may be less information publicly available about foreign companies than about most U.S. companies.

The Portfolio also involves the risk that fluctuations in exchange rates between the U.S. dollar and foreign currencies may negatively affect the value of the ADRs. For example, if the underlying foreign stock to the ADR rose 10% in price but the U.S. dollar gained 5% against the related foreign currency, a U.S. investor's return would likely be reduced to about 5%. This is because the foreign currency would "buy" fewer dollars or, conversely, a dollar would buy more of the foreign currency. Many foreign currencies have fluctuated widely against the U.S. dollar for a variety of reasons such as supply and demand of the currency, investor perceptions of world or country economies, political instability, currency speculation by institutional investors, changes in government policies, buying and selling of currencies by central banks of countries, trade balances and changes in interest rates.

Consumer Discretionary and Consumer Staples Issuers. Each Portfolio invests significantly in issuers that manufacture or sell consumer products. The profitability of these companies will be affected by various factors including the general state of the economy and consumer spending trends. In the past, there have been major changes in the retail environment due to the declaration of bankruptcy by some of the major corporations involved in the retail industry, particularly the department store segment. The continued viability of the retail industry will depend on the industry's ability to adapt and to compete in changing economic and social conditions, to attract and retain capable management, and to finance expansion. Weakness in the banking or real estate industry, a recessionary economic climate with the consequent slowdown in employment growth, less favorable trends in unemployment or a marked deceleration in real disposable personal income growth could result in significant pressure on both consumer wealth and consumer confidence, adversely affecting consumer spending habits. Increasing employee and retiree benefit costs may also have an adverse effect on the industry. In many sectors of the retail industry, competition may be fierce due to market saturation, converging consumer tastes and other factors. Because of these factors and the recent increase in trade opportunities with other countries, American retailers are now entering global markets which entail added risks

such as sudden weakening of foreign economies, difficulty in adapting to local conditions and constraints and added research costs.

Financial Services Issuers. An investment in Units of the Large Cap Core Strategy, Mid Cap Core Strategy and the All Cap Core Strategy should be made with an understanding of the problems and risks inherent in the bank and financial services industry in general.

Banks and their holding companies are especially subject to the adverse effects of economic recession, volatile interest rates, portfolio concentrations in geographic markets and in commercial and residential real estate loans, and competition from new entrants in their fields of business. Banks are highly dependent on net interest margin. Bank profitability is largely dependent on the availability and cost of capital funds, and can fluctuate significantly when interest rates change or due to increased competition.

Banks and their holding companies are subject to extensive federal regulation and, when such institutions are state-chartered, to state regulation as well. Such regulations impose strict capital requirements and limitations on the nature and extent of business activities that banks may pursue. Furthermore, bank regulators have a wide range of discretion in connection with their supervisory and enforcement authority and may substantially restrict the permissible activities of a particular institution if deemed to pose significant risks to the soundness of such institution or the safety of the federal deposit insurance fund. Regulatory actions, such as increases in the minimum capital requirements applicable to banks and increases in deposit insurance premiums required to be paid by banks and thrifts to the Federal Deposit Insurance Corporation ("FDIC"), can negatively impact earnings and the ability of a company to pay dividends. Neither federal insurance of deposits nor governmental regulations, however, insures the solvency or profitability of banks or their holding companies, or insures against any risk of investment in the securities issued by such institutions.

Technological advances allow nontraditional lending sources to cut overhead and permit the more efficient use of customer data. Banks continue to face tremendous

pressure from mutual funds, brokerage firms and other financial service providers in the competition to furnish services that were traditionally offered by banks.

The Securities and Exchange Commission (“SEC”) and the Financial Accounting Standards Board require the expanded use of market value accounting by banks and have imposed rules requiring market accounting for investment securities held in trading accounts or available for sale. Adoption of additional such rules may result in increased volatility in the reported health of the industry, and mandated regulatory intervention to correct such problems. Additional legislative and regulatory changes may be enacted in the future. In addition, from time to time the deposit insurance system is reviewed by Congress and federal regulators, and proposed reforms of that system could, among other things, further restrict the ways in which deposited moneys can be used by banks or reduce the dollar amount or number of deposits insured for any depositor. Such reforms could reduce profitability, as investment opportunities available to bank institutions become more limited and as consumers look for savings vehicles other than bank deposits. Banks face significant competition from other financial institutions such as mutual funds, credit unions, mortgage banking companies and insurance companies, and increased competition may result from legislative broadening of regional and national interstate banking powers. The Sponsor makes no prediction as to what, if any, manner of bank regulatory actions might ultimately be adopted or what ultimate effect such actions might have on your Portfolio.

The Federal Reserve Board (“FRB”) has issued a policy statement on the payment of cash dividends by bank holding companies. In the policy statement, the FRB expressed its view that a bank holding company experiencing earnings weaknesses should not pay cash dividends which exceed its net income or which could only be funded in ways that would weaken its financial health, such as by borrowing. The FRB also may impose limitations on the payment of dividends as a condition to its approval of certain applications, including applications for approval of mergers and acquisitions.

Companies engaged in the investment management industry are subject to the adverse effects of economic recession, volatile interest rates, and competition from new

entrants in their fields of business. Adverse changes in the direction of the stock market, investor confidence, equity transaction volume, the level and direction of interest rates and the outlook of emerging markets could adversely affect the financial stability, as well as the stock prices, of these companies. Additionally, competitive pressures, including increased competition with new and existing competitors, the ongoing commoditization of traditional businesses and the need for increased capital expenditures on new technology could adversely impact the profit margins of companies in the investment management and brokerage industries. Companies involved in the investment management industry are also subject to extensive regulation by government agencies and self-regulatory organizations, and changes in laws, regulations or rules, or in the interpretation of such laws, regulations and rules could adversely affect the stock prices of such companies.

Companies involved in the insurance, reinsurance and risk management industry underwrite, sell or distribute property, casualty and business insurance. Many factors affect insurance, reinsurance and risk management company profits, including but not limited to interest rate movements, the imposition of premium rate caps, a misapprehension of the risks involved in given underwritings, competition and pressure to compete globally, weather catastrophes or other disasters and the effects of client mergers. Individual companies may be exposed to material risks including reserve inadequacy and the inability to collect from reinsurance carriers. Insurance companies are subject to extensive governmental regulation, including the imposition of maximum rate levels, which may not be adequate for some lines of business. Proposed or potential tax law changes may also adversely affect insurance companies’ policy sales, tax obligations and profitability. In addition to the foregoing, profit margins of these companies continue to shrink due to the commoditization of traditional businesses, new competitors, capital expenditures on new technology and the pressure to compete globally.

In addition to the normal risks of business, companies involved in the insurance and risk management industry are subject to significant risk factors, including those applicable to regulated insurance companies, such as:

- the inherent uncertainty in the process of establishing property-liability loss reserves, and the fact that ultimate losses could materially exceed established loss reserves, which could have a material adverse effect on results of operations and financial condition;
- the fact that insurance companies have experienced, and can be expected in the future to experience, catastrophic losses, which could have a material adverse impact on their financial conditions, results of operations and cash flow;
- the inherent uncertainty in the process of establishing property-liability loss reserves due to changes in loss payment patterns caused by new claim settlement practices;
- the need for insurance companies and their subsidiaries to maintain appropriate levels of statutory capital and surplus, particularly in light of continuing scrutiny by rating organizations and state insurance regulatory authorities, and in order to maintain acceptable financial strength or claims-paying ability ratings;
- the extensive regulation and supervision to which insurance companies are subject, and various regulatory and other legal actions;
- the adverse impact that increases in interest rates could have on the value of an insurance company's investment portfolio and on the attractiveness of certain of its products; and
- the uncertainty involved in estimating the availability of reinsurance and the collectability of reinsurance recoverables.

The state insurance regulatory framework has, during recent years, come under increased federal scrutiny, and certain state legislatures have considered or enacted laws that alter and, in many cases, increase state authority to regulate insurance companies and insurance holding company systems. Further, the National Association of Insurance Commissioners ("NAIC") and state insurance regulators are reexamining existing laws and regulations,

specifically focusing on insurance companies, interpretations of existing laws and the development of new laws. In addition, Congress and certain federal agencies have investigated the condition of the insurance industry in the United States to determine whether to promulgate additional federal regulation. All insurance companies are subject to state laws and regulations that require diversification of their investment portfolios and limit the amount of investments in certain investment categories. Failure to comply with these laws and regulations would cause non-conforming investments to be treated as non-admitted assets for purposes of measuring statutory surplus and, in some instances, would require divestiture. The Sponsor is unable to predict whether any state or federal legislation will be enacted to change the nature or scope of regulation of the insurance industry, or what effect, if any, such legislation would have on the industry.

Information Technology Issuers. The Small Cap Core Strategy, the NASDAQ -100 Growth Leaders Portfolio and PowerPicks Portfolio invest significantly in information technology companies. The Portfolios may be particularly susceptible to a negative impact resulting from adverse market conditions or other factors affecting information technology issuers because any negative impact on the information technology industry will not be diversified among issuers within other unrelated industries. Accordingly, an investment in Units should be made with an understanding of the characteristics of the information technology industry and the risks which such an investment may entail.

The market for information technology products and services, especially those related to the Internet, is characterized by rapidly changing technology, rapid products obsolescence, cyclical market patterns, evolving industry standards and frequent new products introductions. The success of information technology companies depends in substantial part on the timely and successful introduction of new products. An unexpected change in one or more of the technologies affecting an issuer's products or in the market for products based on a particular technology could have a material adverse affect on an issuer's operating results. Furthermore, there can be no assurance that companies will be able to

respond timely to compete in the rapidly developing marketplace.

The market for certain information technology products and services may have only recently begun to develop, is rapidly evolving and is characterized by an increasing number of market entrants. Additionally, certain information technology companies may have only recently commenced operations or offered equity securities to the public. Such companies are in the early stage of development and have a limited operating history on which to analyze future operating results. It is important to note that following its initial public offering, a security is likely to experience substantial stock price volatility and speculative trading. According, there can be no assurance that, upon redemption of your Units or termination of the Portfolio, you will receive an amount greater than or equal to your initial investment.

Based on trading history, factors such as announcements of new products or development of new technologies and general conditions of the industry have caused and are likely to cause the market price of information technology common stocks to fluctuate substantially. In addition, information technology company stocks have experienced extreme price and volume fluctuations that often have been unrelated to the operating performance of such companies. This market volatility may adversely affect the market price of the Securities and therefore your ability to redeem your Units, or roll over your Units into a new trust, at a price equal to or greater than the original price paid for such Units.

Some key components of certain products of information technology issuers are currently available only from single source. There can be no assurance that in the future suppliers will be able to meet the demand for components in a timely and cost effective manner. Accordingly, an issuer's operating results and customer relationships could be adversely affected by either an increase in price for, or any interruption or reduction in supply of, any key components. Additionally, many information technology issuers are characterized by a highly concentrated customer base consisting of a limited number of large customers who may require product vendors to comply with rigorous and constantly developing industry standards. Any failure to comply with

such standards may result in a significant loss or reduction of sales. Because many products and technology are incorporated into other related products, certain companies are often highly dependent on the performance of other computer, electronics and communications companies. There can be no assurance that these customers will place additional orders, or that an issuer of Securities will obtain orders of similar magnitude as past orders from other customers. Similarly, the success of certain companies is tied to a relatively small concentration of products or technology with intense competition between companies. Accordingly, a decline in demand for such products or technology from such customers could have a material adverse impact on issuers of the Securities.

The life cycle of a new technology product or service tends to be short, resulting in volatile sales, earnings and stock prices for many information technology companies. Additionally, with the rapid evolution of technologies, competitive advantages tend to be short lived and product pricing usually falls. Historically, many of the benefits from new technologies have gone to the consumer, as their creators have been unable to retain differentiation or pricing power. Some of the large information technology companies have been involved in antitrust litigation and may continue to be in the future. A slowdown in corporate or consumer spending on technology will likely hurt information technology company revenues. Information technology companies rely on international sales for a meaningful part of their revenues. Any slowdown in international economies could hurt revenues.

Communication Services Issuers. The NASDAQ-100 Growth Leaders Portfolio invests significantly in the communication services industry, which includes telecommunications companies. This industry is primarily characterized by extensive government regulation and intense competition.

Companies in the communication services industry allocate significant resources in efforts to comply with applicable government regulations. Communications companies operating in the U.S. must comply with applicable state and federal regulations, including those of the Federal Communications Commission. The costs

of complying with governmental regulations, delays or failure to receive required regulatory approvals or the enactment of new adverse regulatory requirements may negatively affect the business of communications companies. Recent industry consolidation trends may lead to increased regulation in primary markets. Internationally, communications companies may face regulatory challenges such as securing pre-marketing clearance of products and prices, which may be arbitrary and unpredictable. U.S. federal and state governments regulate permitted rates of return and the kinds of services that a company may offer. U.S. federal legislation governing the telecommunications industry may become subject to judicial review and additional interpretation, which may adversely affect certain communications issuers. The competitive landscape in the communications industry is intense and constantly evolving. The products and services of these companies may become outdated very rapidly. A company's performance can be hurt if the company fails to keep pace with technological advances. At the same time, demand for some communications services remains weak, as several key markets are oversaturated and many customers can choose between several service providers and technology platforms. To meet increasing competition, companies may have to commit substantial capital, particularly in the formulation of new products and services using new technologies. As a result, many companies have been compelled to cut costs by reducing their workforce, outsourcing, consolidating and/or closing existing facilities and divesting low selling product lines. Certain communication services companies may be engaged in fierce competition for a share of the market of their products and may have higher costs, including liabilities associated with the medical, pension and postretirement expenses of their workforce, than their competitors. As a result, competitive pressures are intense and the stocks are subject to rapid price volatility. Moreover, continued consolidation in this industry could create integration expenses and delay, and consequent management diversion of attention away from ongoing operations and related risks, among other factors, could result in the failure of these companies to realize expected cost savings or synergies. Several high-profile bankruptcies of large telecommunications companies in

the past have illustrated the potentially unstable condition of the telecommunications industry. High debt loads that were accumulated during the industry growth spurt of the 1990s caught up to the industry, causing debt and stock prices to trade at distressed levels for many telecommunications companies and increasing the cost of capital for needed additional investment. Furthermore, certain companies involved in the industry have also faced scrutiny for alleged accounting irregularities that may have led to the overstatement of their financial results, and other companies in the industry may face similar scrutiny. Moreover, some companies have begun the process of emerging from bankruptcy and may have reduced levels of debt and other competitive advantages over other telecommunications companies. Due to these and other factors, the risk level of owning the securities of communications services companies remains substantial and may continue to rise.

Liquidity. Whether or not the stocks in a Portfolio are listed on a stock exchange, the stocks may delist from the exchange or principally trade in an over-the-counter market. As a result, the existence of a liquid trading market could depend on whether dealers will make a market in the stocks. We cannot guarantee that dealers will maintain a market or that any market will be liquid. The value of the stocks could fall if trading markets are limited or absent.

Additional Units. The Sponsor may create additional Units of a Portfolio by depositing into the Portfolio additional stocks or cash with instructions to purchase additional stocks. A deposit could result in a dilution of your investment and anticipated income because of fluctuations in the price of the stocks between the time of the deposit and the purchase of the stocks and because your Portfolio will pay brokerage or acquisition fees.

CFRA. The Sponsor, on behalf of the PowerPicks Portfolio as described in the prospectus, has entered into a license agreement with CFRA, an independent research firm, under which the PowerPicks Portfolio is granted licenses to use certain trademarks and trade names, to the extent the Sponsor deems appropriate and desirable under federal and state securities laws to indicate the source of the index as a basis for determining the composition of the PowerPicks Portfolio. CFRA is the

registered operating name or “doing business as” for its legal entity Accounting Research & Analytics, LLC. *The PowerPicks Portfolio is not sponsored, managed, sold or promoted by CFRA and its affiliates.*

CFRA MAKES NO REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE OWNERS OF THE POWERPICKS PORTFOLIO OR ANY OTHER PERSON REGARDING THE ADVISABILITY OF INVESTING IN SECURITIES GENERALLY, OR IN THE PORTFOLIO PARTICULARLY, OR THE ABILITY OF CFRA'S MODEL PORTFOLIOS TO TRACK GENERAL MARKET PERFORMANCE. CFRA IS NOT RESPONSIBLE FOR AND HAS NOT PARTICIPATED IN THE DETERMINATION OF THE PRICES AND AMOUNT OF THE POWERPICKS PORTFOLIO OR THE TIMING OF THE ISSUANCE OR SALE OF THE PORTFOLIO OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY WHICH THE PORTFOLIO MAY BE CONVERTED INTO CASH OR OTHER REDEMPTION MECHANICS. CFRA HAS NO OBLIGATION OR LIABILITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR TRADING OF THE POWERPICKS PORTFOLIO. CFRA IS NOT AN INVESTMENT ADVISOR. INCLUSION OF A SECURITY WITHIN A CFRA MODEL PORTFOLIO IS NOT A RECOMMENDATION BY CFRA TO BUY, SELL, OR HOLD ANY SECURITY, NOR IS IT INVESTMENT ADVICE. CFRA AND ITS SUPPLIERS DO NOT GUARANTEE THE ADEQUACY, ACCURACY, TIMELINESS AND/OR THE COMPLETENESS OF THE CFRA MODEL PORTFOLIOS OR ANY DATA RELATED THERETO OR ANY COMMUNICATION WITH RESPECT THERETO, INCLUDING, ORAL, WRITTEN, OR ELECTRONIC COMMUNICATIONS. CFRA AND ITS SUPPLIERS SHALL NOT BE SUBJECT TO ANY DAMAGES OR LIABILITY FOR ANY ERRORS, OMISSIONS, OR DELAYS IN ITS SERVICES. CFRA MAKES NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIMS ALL WARRANTIES, OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE OR AS TO RESULTS TO BE OBTAINED BY USERS, OWNERS OF THE POWERPICKS PORTFOLIO, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE CFRA MODEL PORTFOLIOS OR WITH RESPECT TO ANY DATA RELATED THERETO. WITHOUT LIMITING ANY OF THE

FOREGOING, IN NO EVENT WHATSOEVER SHALL CFRA BE LIABLE FOR ANY INDIRECT, SPECIAL, INCIDENTAL, PUNITIVE, OR CONSEQUENTIAL DAMAGES, INCLUDING BUT NOT LIMITED TO, LOSS OF PROFITS, TRADING LOSSES, LOST TIME, OR GOODWILL, EVEN IF THEY HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, WHETHER IN CONTRACT, TORT, STRICT LIABILITY, OR OTHERWISE.

S&P Dow Jones Indices LLC. The S&P 500 Index, S&P MidCap 400 Index, S&P SmallCap 600 Index and S&P 1500 Index (collectively, the “Indices”) are products of S&P Dow Jones Indices LLC (“S&P DJI”), and have been licensed for use by Invesco Capital Markets, Inc. “Standard & Poor’s®”, “S&P®”, “S&P 500®”, “S&P MidCap 400®”, “S&P SmallCap 600®” and “S&P 1500®” are registered trademarks of S&P Global or its affiliates; and these trademarks have been licensed for use by S&P DJI and sublicensed for certain purposes by Invesco Capital Market, Inc. The Portfolios are not sponsored, endorsed, sold or promoted by S&P DJI, S&P, any of their respective affiliates (collectively, “S&P Dow Jones Indices”). S&P Dow Jones Indices makes no representation or warranty, express or implied, to the owners of the Portfolios or any member of the public regarding the advisability of investing in securities generally or in the Portfolios particularly or the ability of the Indices to track general market performance. S&P Dow Jones Indices’ only relationship to Invesco Capital Market, Inc. with respect to the Indices is the licensing of the Index and certain trademarks, service marks and/or trade names of S&P Dow Jones Indices or its licensors. The Indices are determined, composed and calculated by S&P Dow Jones Indices without regard to Invesco Capital Markets, Inc. or the Portfolios. S&P Dow Jones Indices have no obligation to take the needs of Invesco Capital Markets, Inc. or the owners of the Portfolios into consideration in determining, composing or calculating the Indices. S&P Dow Jones Indices is not responsible for and has not participated in the determination of the prices, and amount of the Portfolios or the timing of the issuance or sale of the Portfolios or in the determination or calculation of the equation by which the Portfolios are to be converted into cash, surrendered or redeemed, as the case may be. S&P Dow Jones Indices has no obligation

or liability in connection with the administration, marketing or trading of the Portfolios. There is no assurance that investment products based on the Indices will accurately track index performance or provide positive investment returns. S&P Dow Jones Indices LLC is not an investment advisor. Inclusion of a security within an index is not a recommendation by S&P Dow Jones Indices to buy, sell, or hold such security, nor is it considered to be investment advice. Notwithstanding the foregoing, CME Group Inc. and its affiliates may independently issue and/or sponsor financial products unrelated to the Portfolios currently being issued by Invesco Capital Markets, Inc., but which may be similar to and competitive with the Portfolios. In addition, CME Group Inc. and its affiliates may trade financial products which are linked to the performance of the Indices.

S&P DJI DOES NOT GUARANTEE THE ADEQUACY, ACCURACY, TIMELINESS AND/OR THE COMPLETENESS OF THE INDICES OR ANY DATA RELATED THERETO OR ANY COMMUNICATION, INCLUDING BUT NOT LIMITED TO, ORAL OR WRITTEN COMMUNICATION (INCLUDING ELECTRONIC COMMUNICATIONS) WITH RESPECT THERETO. S&P DOW JONES INDICES SHALL NOT BE SUBJECT TO ANY DAMAGES OR LIABILITY FOR ANY ERRORS, OMISSIONS, OR DELAYS IN CALCULATING THE INDICES. S&P DOW JONES INDICES MAKE NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIMS ALL WARRANTIES, OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE OR AS TO RESULTS TO BE OBTAINED BY THE SPONSOR OR OWNERS OF THE PRODUCTS, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE INDICES OR WITH RESPECT TO ANY DATA RELATED THERETO. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT WHATSOEVER SHALL S&P DOW JONES INDICES BE LIABLE FOR ANY INDIRECT, SPECIAL, INCIDENTAL, PUNITIVE, OR CONSEQUENTIAL DAMAGES INCLUDING BUT NOT LIMITED TO, LOSS OF PROFITS, TRADING LOSSES, LOST TIME OR GOODWILL, EVEN IF THEY HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, WHETHER IN CONTRACT, TORT, STRICT LIABILITY, OR OTHERWISE.

Voting. Only the Trustee may sell or vote the stocks in a Portfolio. While you may sell or redeem your Units, you may not sell or vote the stocks in your Portfolio. The Sponsor will instruct the Trustee how to vote the stocks. The Trustee will vote the stocks in the same general proportion as shares held by other shareholders if the Sponsor fails to provide instructions.

SPONSOR INFORMATION

Invesco Capital Markets, Inc. is the Sponsor of your Portfolio. The Sponsor is a wholly owned subsidiary of Invesco Advisers, Inc. (“Invesco Advisers”). Invesco Advisers is an indirect wholly owned subsidiary of Invesco Ltd., a leading independent global investment manager that provides a wide range of investment strategies and vehicles to its retail, institutional and high net worth clients around the globe. The Sponsor’s principal office is located at 11 Greenway Plaza, Houston, Texas 77046-1173. As of March 31, 2023, the total stockholders’ equity of Invesco Capital Markets, Inc. was \$88,656,309.53 (unaudited). The current assets under management and supervision by Invesco Ltd. and its affiliates were valued at approximately \$1,483.0 billion as of March 31, 2023. (This paragraph relates only to the Sponsor and not to your Portfolio or to any other Series thereof. The information is included herein only for the purpose of informing investors as to the financial responsibility of the Sponsor and its ability to carry out its contractual obligations. More detailed financial information will be made available by the Sponsor upon request).

The Sponsor and your Portfolio have adopted a code of ethics requiring Invesco Ltd.’s employees who have access to information on Portfolio transactions to report personal securities transactions. The purpose of the code is to avoid potential conflicts of interest and to prevent fraud, deception or misconduct with respect to your Portfolio.

If the Sponsor shall fail to perform any of its duties under the Trust Agreement or become incapable of acting or shall become bankrupt or its affairs are taken over by public authorities, then the Trustee may (i) appoint a successor Sponsor at rates of compensation deemed by the Trustee to be reasonable and not exceeding amounts prescribed by the SEC, (ii) terminate the Trust Agreement

and liquidate the Portfolios as provided therein or (iii) continue to act as Trustee without terminating the Trust Agreement.

TRUSTEE INFORMATION

The Trustee is The Bank of New York Mellon, a trust company organized under the laws of New York. The Bank of New York Mellon has its principal unit investment trust division offices at 240 Greenwich Street - 22W, New York, New York 10286, (800) 856-8487. The Bank of New York Mellon is subject to supervision and examination by the Superintendent of Banks of the State of New York and the Board of Governors of the Federal Reserve System, and its deposits are insured by the Federal Deposit Insurance Corporation to the extent permitted by law.

The duties of the Trustee are primarily ministerial in nature. It did not participate in the selection of Securities for the Portfolios.

In accordance with the Trust Agreement, the Trustee shall keep proper books of record and account of all transactions at its office for each Portfolio. Such records shall include the name and address of, and the number of Units of each Portfolio held by, every Unitholder. Such books and records shall be open to inspection by any Unitholder at all reasonable times during the usual business hours. The Trustee shall make such annual or other reports as may from time to time be required under any applicable state or federal statute, rule or regulation. The Trustee is required to keep a certified copy or duplicate original of the Trust Agreement on file in its office available for inspection at all reasonable times during the usual business hours by any Unitholder, together with a current list of the Securities held in each Portfolio.

Under the Trust Agreement, the Trustee or any successor trustee may resign and be discharged of its responsibilities created by the Trust Agreement by executing an instrument in writing and filing the same with the Sponsor. The Trustee or successor trustee must mail a copy of the notice of resignation to all Unitholders then of record, not less than 60 days before the date specified in such notice when such resignation is to take effect. The Sponsor upon receiving notice of such resignation is obligated to appoint a successor trustee promptly. If, upon such resignation, no successor trustee has been appointed

and has accepted the appointment within 30 days after notification, the retiring Trustee may apply to a court of competent jurisdiction for the appointment of a successor. The Sponsor may remove the Trustee and appoint a successor trustee as provided in the Trust Agreement at any time with or without cause. Notice of such removal and appointment shall be mailed to each Unitholder by the Sponsor. Upon execution of a written acceptance of such appointment by such successor trustee, all the rights, powers, duties and obligations of the original trustee shall vest in the successor. The resignation or removal of a Trustee becomes effective only when the successor trustee accepts its appointment as such or when a court of competent jurisdiction appoints a successor trustee.

Any corporation into which a Trustee may be merged or with which it may be consolidated, or any corporation resulting from any merger or consolidation to which a Trustee shall be a party, shall be the successor trustee. The Trustee must be a banking corporation organized under the laws of the United States or any state and having at all times an aggregate capital, surplus and undivided profits of not less than \$5,000,000.

TAXATION

Regulated Investment Companies. The prospectus contains a discussion of certain U.S. federal income tax issues concerning the Portfolios and the purchase, ownership and disposition of Portfolio Units. The discussion below supplements the prospectus discussion and is qualified in its entirety by the prospectus discussion. Prospective investors should consult their own tax advisors with regard to the federal tax consequences of the purchase, ownership, or disposition of Portfolio Units, as well as the tax consequences arising under the laws of any state, locality, non-U.S. country, or other taxing jurisdiction.

The federal income tax summary below and in the prospectus is based in part on the advice of counsel to the Portfolios. The Internal Revenue Service could disagree with any conclusions set forth in these discussions. In addition, our counsel was not asked to review and has not reached a conclusion with respect to the federal income tax treatment of the assets to be held by the Portfolios.

The Portfolios intend to elect and to qualify annually as a regulated investment company under the Internal Revenue Code of 1986, as amended (the “Code”) and to comply with applicable distribution requirements so that it will not pay federal income tax on income and capital gains distributed to its Unitholders.

To qualify for the favorable U.S. federal income tax treatment generally accorded to regulated investment companies, a Portfolio must, among other things, (a) derive in each taxable year at least 90% of its gross income from dividends, interest, payments with respect to securities loans and gains from the sale or other disposition of stock, securities or foreign currencies or other income derived with respect to its business of investing in such stock, securities or currencies, and net income from qualified publicly traded partnerships; (b) diversify its holdings so that, at the end of each quarter of the taxable year, (i) at least 50% of the market value of a Portfolio’s assets is represented by cash and cash items (including receivables), U.S. government securities, the securities of other regulated investment companies and other securities, with such other securities of any one issuer generally limited for the purposes of this calculation to an amount not greater than 5% of the value of a Portfolio’s total assets and not greater than 10% of the outstanding voting securities of such issuer, and (ii) not more than 25% of the value of its total assets is invested in the securities (other than U.S. government securities or the securities of other regulated investment companies) of any one issuer, or two or more issuers which a Portfolio controls (by owning 20% or more of the issuer’s outstanding voting securities) and which are engaged in the same, similar or related trades or businesses, or the securities of qualified publicly traded partnerships; and (c) distribute at least 90% of its investment company taxable income (which includes, among other items, dividends, interest and net short-term capital gains in excess of net long-term capital losses but excludes net capital gain, if any) and at least 90% of its net tax-exempt interest income, if any, each taxable year.

As a regulated investment company, a Portfolio generally will not be subject to U.S. federal income tax on its investment company taxable income (as that term is defined in the Code, but without regard to the deduction

for dividends paid) and net capital gain (the excess of net long-term capital gain over net short-term capital loss), if any, that it distributes to Unitholders. Your Portfolio intends to distribute to its Unitholders, at least annually, substantially all of its investment company taxable income and net capital gain. If a Portfolio retains any net capital gain or investment company taxable income, it will generally be subject to federal income tax at regular corporate rates on the amount retained. In addition, amounts not distributed on a timely basis in accordance with a calendar year distribution requirement are subject to a nondeductible 4% excise tax unless, generally, a Portfolio distributes during each calendar year an amount equal to the sum of (1) at least 98% of its ordinary income (not taking into account any capital gains or losses) for the calendar year, (2) at least 98.2% of its capital gains in excess of its capital losses (adjusted for certain ordinary losses) for the one-year period ending October 31 of the calendar year, and (3) any ordinary income and capital gains for previous years that were not distributed or taxed during those years. To prevent application of the excise tax, the Portfolios intend to make its distributions in accordance with the calendar year distribution requirement. Further, if a Portfolio retains any net capital gain, the Portfolio may designate the retained amount as undistributed capital gains in a notice to Unitholders who, if subject to federal income tax on long-term capital gains (i) will be required to include in income for federal income tax purposes, as long-term capital gain, their share of such undistributed amount, and (ii) will be entitled to credit their proportionate share of the tax paid by the Portfolio against their federal income tax liabilities, if any, and to claim refunds to the extent the credit exceeds such liabilities. A distribution will be treated as paid on December 31 of the current calendar year if it is declared by a Portfolio in October, November or December with a record date in such a month and paid by the Portfolio during January of the following calendar year. These distributions will be taxable to Unitholders in the calendar year in which the distributions are declared, rather than the calendar year in which the distributions are received. There is no assurance that distributions made by your Portfolio will be sufficient to eliminate all taxes on the Trust for all periods. Your Portfolio may make taxable

distributions to you even during periods in which the value of your Units has declined.

If a Portfolio failed to qualify as a regulated investment company or failed to satisfy the 90% distribution requirement in any taxable year, the Portfolio would be taxed as an ordinary corporation on its taxable income (even if such income were distributed to its Unitholders) and all distributions out of earnings and profits would be taxable to Unitholders as ordinary dividend income.

Your Portfolio may be required to withhold as backup withholding federal income tax at the backup withholding rate on all taxable distributions payable to you if you fail to provide your correct taxpayer identification number or to make required certifications, or if you have been notified by the IRS that you are subject to backup withholding. Backup withholding is not an additional tax. Any amounts withheld may be credited against your federal income tax liability if you provide the required information or certification.

If your Portfolio is treated as holding directly or indirectly 10 percent or more of the combined value or voting power of the stock of a foreign corporation, and all U.S. shareholders collectively own more than 50 percent of the vote or value of the stock of such corporation, the foreign corporation may be treated as a “controlled foreign corporation” (a “CFC”) for U.S. federal income tax purposes. In such circumstances, your Portfolio will be required to include certain types of passive income and certain other types of income relating to insurance, sales and services with related parties and oil related income in the Portfolio’s taxable income whether or not such income is distributed.

If a Portfolio holds an equity interest in any “passive foreign investment companies” (“PFICs”), which are generally certain foreign corporations that receive at least 75% of their annual gross income from passive sources (such as interest, dividends, certain rents and royalties or capital gains) or that hold at least 50% of their assets in investments producing such passive income, the Portfolio could be subject to U.S. federal income tax and additional interest charges on gains and certain distributions with respect to those equity interests, even if all the income or gain is timely distributed to its Unitholders. Your Portfolio

will not be able to pass through to its Unitholders any credit or deduction for such taxes. Your Portfolio may be able to make an election that could ameliorate these adverse tax consequences. In this case, your Portfolio would recognize as ordinary income any increase in the value of such PFIC shares, and as ordinary loss any decrease in such value to the extent it did not exceed prior increases included in income. Under this election, your Portfolio might be required to recognize in a year income in excess of its distributions from PFICs and its proceeds from dispositions of PFIC stock during that year, and such income would nevertheless be subject to the distribution requirement and would be taken into account for purposes of the 4% excise tax (described above). Dividends paid by PFICs will not be treated as qualified dividend income.

PORTFOLIO TERMINATION

A Portfolio may be liquidated at any time by consent of Unitholders representing 66 2/3% of the Units of such Portfolio then outstanding or by the Trustee when the value of the Securities owned by a Portfolio, as shown by any evaluation, is less than \$500,000 (\$3,000,000 if the value of the Portfolio has exceeded \$15,000,000). A Portfolio will be liquidated by the Trustee in the event that a sufficient number of Units of such Portfolio not yet sold are tendered for redemption by the Sponsor, so that the net worth of such Portfolio would be reduced to less than 40% of the value of the Securities at the time they were deposited in such Portfolio. If a Portfolio is liquidated because of the redemption of unsold Units by the Sponsor, the Sponsor will refund to each purchaser of Units the entire sales charge paid by such purchaser. The Trust Agreement will terminate upon the sale or other disposition of the last Security held thereunder, but in no event will it continue beyond the Mandatory Termination Date.

Commencing during the period beginning nine business days prior to, and no later than, the Mandatory Termination Date, Securities will begin to be sold in connection with the termination of the Portfolios. The Sponsor will determine the manner, timing and execution of the sales of the Securities. The Sponsor shall direct the liquidation of the Securities in such manner as to effectuate orderly sales and a minimal market impact. In

the event the Sponsor does not so direct, the Securities shall be sold within a reasonable period and in such manner as the Trustee, in its sole discretion, shall determine. Unitholders will receive a cash distribution from the sale of the remaining Securities within a reasonable time following the Mandatory Termination Date. The Trustee will deduct from the funds of the appropriate Portfolio any accrued costs, expenses, advances or indemnities provided by the Trust Agreement, including estimated compensation of the Trustee, costs of liquidation and any amounts required as a reserve to provide for payment of any applicable taxes or other governmental charges. Any sale of Securities in a Portfolio upon termination may result in a lower amount than might otherwise be realized if such sale were not required at such time. The Trustee will then distribute to each Unitholder of each Portfolio his pro rata share of the balance of the Income and Capital Accounts of such Portfolio.

The Sponsor may, but is not obligated to, offer for sale units of subsequent series of the Portfolios. There is, however, no assurance that units of any new series of the Portfolios will be offered for sale at that time, or if offered, that there will be sufficient units available for sale to meet the requests of any or all Unitholders.

Within 60 days of the final distribution Unitholders will be furnished a final distribution statement of the amount distributable. At such time as the Trustee in its sole discretion will determine that any amounts held in reserve are no longer necessary, it will make distribution thereof to Unitholders in the same manner.
